Firefighters' Board: Gaylord Candler, Ed Dawson, John McDaniel, Lance Huish (absent), Debbie White (absent)

Courtesy of the Floor to Visitors

No one came forward to address the Boards.

APPROVAL OF MINUTES

A. Consideration by General Employees', Police Officers', and Firefighters' Board of Trustees

1. *Approve* Minutes of Joint Quarterly Meeting held November 9, 2022.

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Approve* Minutes of the Joint Quarterly Meeting held on November 9, 2022.

Vote: Voice vote resulted in all Ayes by General Employees', Police Officers' and Firefighters' Board of Trustees.

OLD BUSINESS

NEW BUSINESS

A. Consideration by General Employees' Board of Trustees

1. *Approve* - Application for Retirement – Dennis Faulkner – AS400 Systems Analyst (Information Systems) Retirement effective 03/01/2023; Separation Date 08/19/2022; Meets age/service requirements for deferred retirement (10 years 0 months of service)

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Approve* - Application for Retirement – Dennis Faulkner – AS400 Systems Analyst (Information Systems) Retirement effective 03/01/2023; Separation Date 08/19/2022; Meets age/service requirements for deferred retirement (10 years 0 months of service)

Roll call vote: Ayes – Currie, Janson, Hoffman,
The motion passed unanimously

2. *Approve* – Application for Retirement – Michael Coleman – Grounds Crew Leader (Parks) Back-DROP Retirement effective 01/01/2020; Separation Date 12/30/2022; Meets age/service requirements for service retirement (33 years 9 months of service)

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Approve* – Application for Retirement – Michael Coleman – Grounds Crew Leader (Parks) Back-DROP Retirement effective 01/01/2020; Separation Date 12/30/2022; Meets age/service requirements for service retirement (33 years 9 months of service)

Roll call vote: Ayes – Currie, Janson, Hoffman,
The motion passed unanimously

3. *Approve* – Application for Retirement – Lamar Whitaker – Utilities Superintendent (Beaches Energy) Back-DROP Retirement effective 02/01/2020; Separation Date 01/16/2023; Meets age/service requirements for service retirement (36 years 6 months)

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Approve* – Application for Retirement – Lamar Whitaker – Utilities Superintendent (Beaches Energy) Back-DROP Retirement effective 02/01/2020; Separation Date 01/16/2023; Meets age/service requirements for service retirement (36 years 6 months)

Roll call vote: Ayes – Currie, Janson, Hoffman,
The motion passed unanimously

B. Consideration by General Employees', Police Officers' and Firefighters' Board of Trustees

1. Consultant's Reports/Presentations
 - a. *Approve* December 31, 2022; Quarterly Investment Performance Report from AndCo Consulting (Brendan Vavrica), Investment Consultant.

Motion: It was moved by Mr. Cohill and seconded by Mr. Dean to *Approve* December 31, 2022, Quarterly Investment Performance Report from AndCo Consulting (Brendan Vavrica), Investment Consultant.

Roll call vote: Ayes – Cohill, Dean, Sharp
The motion passed unanimously.

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Approve* December 31, 2022, Quarterly Investment Performance Report from AndCo Consulting (Brendan Vavrica), Investment Consultant.

Roll call vote: Ayes – Currie, Janson, Hoffman,
The motion passed unanimously.

Motion: It was moved by Mr. McDaniel and seconded by Mr. Dawson to *Approve* December 31, 2022, Quarterly Investment Performance Report from AndCo Consulting (Brendan Vavrica), Investment Consultant.

Roll call vote: Ayes – Candler, Dawson, McDaniel,
The motion passed unanimously.

- b. *Possible Action* Rebalance or allocation of portfolio assets in accordance with Statement of Investment Policy and Consultant's recommendations.

- i. **Motion:** It was moved by Mr. Cohill and seconded by Mr. Sharp to *Move* \$3 million into the Baird Short Term Bond Instl (BSBIX) using existing cash.

Roll call vote: Ayes – Cohill, Dean, Sharp
The motion passed unanimously.

Motion: It was moved by Mr. Janson and seconded by Mr. Currie to *Move* \$3 million into the Baird Short Term Bond Instl (BSBIX) using existing cash.

Roll call vote: Ayes – Currie, Janson, Hoffman,
The motion passed unanimously.

Motion: It was moved by Mr. Candler and seconded by Mr. Dawson to *Move* \$3 million into the Baird Short Term Bond Instl (BSBIX) using existing cash.

Roll call vote: Ayes – Candler, Dawson, McDaniel,
The motion passed unanimously.

- ii. The consensus of General Employees', Police Officers' and Firefighters' Board of Trustees was to table the decision to make any changes regarding international equity.

2. Plan Administrator's Reports/Presentations

- a. *Informational* December 31, 2022; Quarterly Pension Plan Administrator's Report

Annual Actuarial Valuations

May 9, 2023

October 1, 2022 Actuarial Valuations

- October 1, 2022 actuarial valuations performed for the purposes of:
 - Determining annual required contributions for the fiscal year beginning October 1, 2023
 - Determining the funded ratios of the Systems as of October 1, 2022
 - Assessing certain risks and trends beyond the contributions and funded ratios

Financing Diagram

The Concept of a Present Value

- The present value of an amount of money payable in the future is the amount of money that, if we had it today, would accumulate to the amount that will be payable considering:
 - Investment return
 - Probability that money will be paid
- The present value of \$1,000 payable 1 year from now with certainty at 7.5% interest is \$930, i.e., $\$1,000/1.075$.

Present Value of Future Benefits

Retired and Vested Terminated Members

	Retired Members

Total Pay	\$14,222,366	\$5,157,516	\$2,064,466

Funding Value of Assets

- Reported market value is converted to a funding value of assets for valuation purposes.
- The 2022 funding value of assets recognizes assumed investment return of 7.50% for General and Police and 6.625% for Fire. This is the investment return assumption from the prior valuation.
- Differences between market return and assumed return are phased-in over a closed 4-year period.
- The reason for this method is an attempt to moderate employer contribution rate volatility.

Observed Experience

- Funded ratios as of October 1, 2022 are:
 - 84.5% for General, a decrease from 85.0% last year
 - 97.1% for Police Officers, a decrease from 98.7% last year
 - 78.0% for Firefighters, a decrease from 83.2% last year
- This was a result of an aggregate experience loss and assumption changes for Fire.

Risk Measures – General Employees

• Revised actuarial assumptions.

(5). The funded ratio is the most widely known measure of a plan's financial strength, but the trend in the funded ratio is much more important than the absolute ratio. The funded ratio should trend to 100%. As it approaches 100%, it is important to re-evaluate the level of investment risk in the portfolio and potentially to re-evaluate the assumed rate of return.

(6) and (7). The ratio of retiree liabilities to total accrued liabilities gives an indication of the maturity of the system. As the ratio increases, cash flow needs increase, and the liquidity needs of the portfolio change. A ratio on the order of 50% indicates a maturing system.

(8) and (9). The ratio of liabilities and assets to payroll gives an indication of both maturity and volatility. Many systems have ratios between 500% and 700%. Ratios significantly above that range may indicate difficulty in supporting the benefit level as a level % of payroll.

(10) The ratio of unfunded liability to payroll gives an indication of the plan sponsor's ability to actually pay off the unfunded liability. A ratio above approximately 300% or 400% may indicate difficulty in discharging the unfunded liability within a reasonable time frame.

(11) and (12). Positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means benefits and expenses exceed contributions, and existing funds may be used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

(13) and (14). Investment return is probably the largest single risk that most systems face. The year-by-year return and the five-year geometric average both give an indication of the reasonableness of the system's assumed return. Of course past performance is not a guarantee of future results. Market rate shown is based on actuarial estimation method and will differ modestly from figures reported by the investment consultant.

(5). The funded ratio is the most widely known measure of a plan's financial strength, but the trend in the funded ratio is much more important than the absolute ratio. The funded ratio should trend to 100%. As it approaches 100%, it is important to re-evaluate the level of investment risk in the portfolio and potentially to re-evaluate the assumed rate of return.

(6) and (7). The ratio of retiree liabilities to total accrued liabilities gives an indication of the maturity of the system. As the ratio increases, cash flow needs increase, and the liquidity needs of the portfolio change. A ratio on the order of 50% indicates a maturing system.

(8) and (9). The ratio of liabilities and assets to payroll gives an indication of both maturity and volatility. Many systems have ratios between 500% and 700%. Ratios significantly above that range may indicate difficulty in supporting the benefit level as a level % of payroll.

(10) The ratio of unfunded liability to payroll gives an indication of the plan sponsor's ability to actually pay off the unfunded liability. A ratio above approximately 300% or 400% may indicate difficulty in discharging the unfunded liability within a reasonable time frame.

(11) and (12). Positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means benefits and expenses exceed contributions, and existing funds may be used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

(13) and (14). Investment return is probably the largest single risk that most systems face. The year-by-year return and the five-year geometric average both give an indication of the reasonableness of the system's assumed return. Of course past performance is not a guarantee of future results. Market rate shown is based on actuarial estimation method and will differ modestly from figures reported by the investment consultant.

Board of Trustees
City of Jacksonville Beach
Firefighters' Retirement System
Jacksonville Beach, Florida

The results of the October 1, 2022 Annual Actuarial Valuation of the City of Jacksonville Beach Firefighters' Retirement System are presented in this report. The purpose of the annual valuation is to measure the System's funding progress and to determine the Local Employers' contribution rate for the fiscal year ending September 30, 2024 in accordance with established funding policies. The results of the valuation may not be applicable for other purposes. Disclosures under the Governmental Accounting Board (GASB) Statements No. 67 and No. 68 were issued in a separate report.

This report should not be relied on for any purpose other than those described above. It was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report. The signing actuaries are independent of the plan sponsor.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. We did not perform an analysis of the potential range of such future measurements under the scope of this assignment.

Valuation results, comments, recommendations (if any) and our certification are contained in Section A.

The valuation was based upon information compiled during the fiscal year ending September 30, 2022, furnished by the City of Jacksonville Beach, concerning pension fund benefits, financial transactions, and individual members, terminated members, retired members and beneficiaries. Data was checked for reasonableness and missing information, but was not audited. GRS is not responsible for the accuracy or completeness of the data provided to us. This information is summarized in Section B.

This report does not fully reflect the recent and still developing impact of COVID-19, which is likely to influence demographic and investment experience, at least in the short term. We will continue to monitor these developments and their impact on the plan.

This report was prepared using our proprietary valuation model and related software which, in our professional judgment, has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

A description of the actuarial valuation process, actuarial assumptions and definitions of technical terms are contained in Section C. Additional Disclosure information is contained in Section D and a summary of valuation results in the State format is contained in Section E.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. We certify that the information contained in this report is accurate and fairly presents the actuarial position of the City of Jacksonville Beach Firefighters' Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. It is our opinion that the actuarial assumptions used for the valuation produce results which are reasonable.

Brad Lee Armstrong and Jeffrey T. Tebeau are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,
Gabriel, Roeder, Smith & Company

SECTION A

**VALUATION RESULTS, COMMENTS, CONCLUSION,
RECOMMENDATIONS (IF ANY) AND STATEMENT BY
ENROLLED ACTUARY**

Funding Objective

The funding objective of the Retirement System is to establish and receive contributions, expressed as dollars, which will achieve progress towards 100% funded status and will remain approximately level from year-to-year and will not have to be increased for future generations of citizens in the absence of benefit improvements. This objective is stated in the Ordinance and meets the requirements of Part VII, Chapter 112, Florida Statutes.

Contribution Rates

The Retirement System is supported by member contributions, property insurance premium tax monies received from the State pursuant to Chapter 175 Florida Statutes (through the fiscal year ending September 20, 2020), Local Employers' contributions (from the cities of Jacksonville and Jacksonville Beach), and investment income from Retirement System assets.

Contributions which satisfy the funding objective are determined by the actuarial valuation and are sufficient to:

- (1) Cover the actuarial costs allocated to the current year (the normal cost) by the actuarial cost methods described in Section C; and
- (2) Finance over a period of future years the actuarial costs not covered by present assets and anticipated future normal costs (Unfunded Actuarial Accrued Liability).

Contribution requirements for the Plan and fiscal year ending September 30, 2024 are shown on pages A-2 and A-3.

Contributions to Finance Benefits of the Retirement System for the Plan Year Ending September 30, 2024 to be Contributed During the Fiscal Year Ending September 30, 2024

Contributions for	Dollars	As a Percent of Active Member Payroll
<i>Normal Cost</i>		
Service pensions	\$ 234,367	11.35 %
Disability pensions	51,472	2.49
Survivor pensions		
Pre-retirement	9,579	0.46
Termination benefits		
Deferred service pensions	83,809	4.06
Refunds of member contributions	17,293	0.84
Total Normal Cost	\$ 396,520	19.21
<i>Unfunded Actuarial Accrued Liability</i>		
Retired members and beneficiaries	0	0.00
Active and vested terminated members	776,068	37.59
Total unfunded actuarial accrued liability	\$ 776,068	37.59
<i>Administrative Expenses</i>	77,576	3.76
<i>Total Calculated Contribution Requirement</i>	\$ 1,250,164	60.56
<i>Adjustments to Calculated Contribution Requirement</i>		
Temporary full funding credit	0	0.00
FS 112.64(5) compliance	0	0.00
Total adjustments	0	0.00
<i>Total Adjusted Contribution Requirement</i>	\$ 1,250,164	60.56 %
Member portion	153,138	7.42 %
Estimated Chapter 175 and Additional Premium	0	0.00 %
Tax Revenue monies		
Estimated Local Employers' portion#	\$ 1,097,026	53.14 %

#Estimated Local Employers' portion is prior to use of accumulated excess of Chapter money and employee contribution "True Up."

FS 112.64 requires that Local Employers' contributions be deposited not less frequently than quarterly. FS 175.131 requires that Chapter 175 monies be deposited within five days of receipt from the State. Member contributions, which are in addition to the Local Employers'/Chapter contributions, must be deposited immediately after each pay period.

Procedures for determining dollar contributions are shown on page A-3.

Comparative contribution amounts for prior fiscal years are shown on page A-14.

Determining Dollar Contributions

The Local Employers/Chapter should contribute \$1,097,026 during the fiscal year ending September 30, 2023. The member contribution amounts may be used as projected dollar contributions for purposes of the Comprehensive Annual Financial Report, but should not be used to reconcile actual member contributions.

Fiscal Year Ending September 30,	2024	2023
Preliminary Contribution Requirement	\$ 1,250,164	\$ 1,135,315
Plus Employee Contribution "True Up"	0 [^]	0 [@]
Total Contribution Requirement	\$ 1,250,164	\$ 1,135,315
Less Member Contributions	153,138	138,197
Less Accumulated Prepaid Contributions	0	0
Total Employer Contribution Requirement	1,097,026	997,118
Less Estimated Chapter 175 and Additional Premium		
Tax Revenue Monies	0	0
Estimated Base Local Employers' Contribution	\$ 1,097,026	\$ 997,118

[^] The 2023 employee contribution were reported to us after making adjustments for true up contributions or credits, therefore no true up calculation was done in this report.

[@] The "True Up" amount applied to FY 2023 would have been the difference between the expected employee contributions of \$150,803 and the actual employee contributions of \$158,581 in 2021. Instead the City of Jacksonville took this as a credit against their 2021 contribution.

The fiscal year ending September 30, 2023 and 2024 Local Employers'/Chapter contribution amounts are estimated to be contributed at the beginning of the fiscal year. If contributions are made on a later schedule, interest should be added at the rate of .53% (.0053) for each month of delay.

Since the UAAL on a market value basis became the financial responsibility of the City of Jacksonville Beach as of November 22, 2019, we have split the Local Employers' contribution below into the portion that the City of Jacksonville will pay and the portion that the City of Jacksonville Beach will pay during the fiscal year ending September 30, 2023 and 2024:

Fire Contribution Requirement

Fiscal Year Ending September 30,	2024	2023
City of Jacksonville Beach [#]	\$ 707,653	\$ 707,653
City of Jacksonville	389,373	289,465

[#] The required contribution by the City of Jacksonville Beach is fixed to be the amount of the amortization of the unfunded liability as of the date of the interlocal agreement less any credits due to the City of Jacksonville Beach.

Funding Progress Achievement Indicators

There is no single all-encompassing measure of a retirement system's funding progress and current funded status.

A traditional measure has been the relationship of valuation assets to Unfunded Actuarial Accrued Liability - a measure that is influenced by the choice of actuarial cost method. This relationship is shown on page A-12.

We believe a better understanding of funding progress and status can be achieved using the following indicators.

Indicator (1) *The actuarial present value of gains or losses realized in the operation of the retirement system.* Gains and losses are expected to cancel each other over an economic cycle but sizable year-to-year fluctuations are common. An experience gain can result from assets increasing in value by more than anticipated, or by the system's obligation increasing by less than anticipated, or by other favorable combinations or deviation from expected asset and liability changes. Further details on the derivation of the gain (loss) are shown on page A-11.

Indicator (2) *The ratio of valuation assets to the actuarial present value of credited projected benefits* allocated in the proportion credited service is to projected total service. The ratio is expected to increase over time, but the basic trend may be interrupted by benefit improvements. This ratio is the most appropriate of the three described here for assessing the need for future contributions above the amounts needed to fund the normal cost.

Indicator (3) *The ratio of the unfunded actuarial present value of credited projected benefits to member payroll.* The unfunded actuarial present value of credited projected benefits is controlled by the funding program. The ratio to payroll is a relative index of condition where inflation is present in both components. The ratio is expected to decrease over time, but the basic trend may be interrupted by benefit improvements.

Funding Progress Indicators* - Historical Development (\$ Amounts in Thousands)

Valuation Date	Indicator (1)		Indicator (2)			Indicator (3)		
	Gain/(Loss)		Funding Value of Assets	APVCPB^	Funded Ratio	Unfunded APVCPB^	Member Payroll	Ratio to Payroll
	Amount	% of AAL						
10/1/1995 (a)	\$ 1,315	4.5 %	\$ 30,791	\$ 28,889	106.6 %	\$ (1,902)	\$ 10,601	(17.90) %
10/1/2000 (aa)	321	4.4	8,055	7,792	103.4	(263)	1,408	(18.69)
10/1/2005	(592)	(6.5)	7,483	8,998	83.2	1,515	1,651	91.74
10/1/2007 (a)	289	3.0	8,044	9,356	86.0	1,312	1,726	76.00

10/1/2021 (a)	522	2.6	16,717	20,081	83.2	3,364	1,871	179.80
10/1/2022 (a)	(1,798)	(8.0)	17,630	22,591	78.0	4,960	2,064	240.27

(a) After changes in benefit provisions and/or actuarial assumptions and actuarial cost methods.

(aa) After Minimum Benefit changes.

^ AAL starting with 2014.

* None of these funding progress indicators are appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations.

Comments and Conclusion

Comment A: For the fiscal year ended September 30, 2022, the Firefighters' System had a \$1,797,843 experience loss. The loss was primarily attributed to lower-than-expected recognized investment return on the funding value of assets (3.6% recognized vs. 6.625% assumed) due to having larger investment losses than gains over the last four years. Additional experience information is reported on pages B-7, B-13, C-4, C-5, and C-6. The funded ratio decreased from 83.2% to 79.3% from 2021 to 2022 on a Funding Value of Assets basis and decreased from 90.6% to 70.3% on a market value of assets basis before assumption changes.

Comment B: The assumed interest rate was lowered from 6.625% to 6.500%. This change increased the City of Jacksonville's contribution by \$57,950 (due to the increase in normal cost; an increase of \$88,083 due to the increase in actuarial accrued liabilities was offset by experience gains since consolidation) and decreased the funded ratio from 79.3% to 78.0%. The funded ratio on a market value basis is 69.2%.

Looking Forward: Due to the Board's use of a four-year smoothed market asset valuation method, greater-than-expected market returns during 2020, and 2021, and lower-than-expected market returns during 2022 have only been partially recognized in developing the Funding Value of Assets as of September 30, 2022. The Funding Value of Assets currently exceeds the Market Value of Assets by \$2,003,554. If gains from investment returns above the 6.50% assumed or gains from other sources do not emerge, this will create upward pressure on contribution requirements and a deceleration of funding progress in subsequent valuation years. An additional risk factor to the level of the contribution rate is the 10-year average payroll growth, which was 0.0% for the 10 years ending September 30, 2022. If the average payroll growth is lower than the wage inflation assumption of 2.5%, this will increase the City's contribution requirement pursuant to compliance with Florida Statute 112.64(5).

Risks to Future Employer Contribution Requirements: There are ongoing risks to future employer contribution requirements to which the Retirement System is exposed, such as:

- Actual and Assumed Investment Rate of Return;
- Actual and Assumed Mortality Rates;
- Amortization Policy;
- F.S. 112.64(5) Compliance Regarding Payroll Growth; and
- F.S. 112.63(1)(f) Updated FRS Mortality Assumptions.

Conclusion: It is the actuary's opinion that the required contribution rates determined by the most recent actuarial valuation are sufficient to meet the Retirement System's funding objective, presuming continued timely receipt of required contributions.

Other Observations

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Contributions and Funded Status

Given the System's contribution allocation procedure, if all actuarial assumptions are met and do not change (including the assumption of the Retirement System earning 6.500% on the Market Value of Assets), it is expected that:

1. The City of Jacksonville will contribute the employer normal cost to cover the cost of benefits accruing each year;
2. The City of Jacksonville Beach's portion of the Unfunded Actuarial Accrued Liability (UAAL) is scheduled to be paid off in the first week of October, 2028 (see complete schedule on page C-2); and
3. The City of Jacksonville's portion of the Unfunded Actuarial Accrued Liability (UAAL) is expected to be paid off in 2033.

Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the Actuarial Accrued Liability (AAL) and the Funding Value of Assets (FVA). Unless otherwise indicated, with regard to any funded status measurements presented in this report:

1. The measurement is inappropriate for assessing the sufficiency of Retirement System assets to cover the estimated cost of settling the Retirement System's benefit obligations, for example: transferring the liability to an unrelated third party in a market value type transaction.
2. The measurement is dependent upon the Actuarial Cost Method which, in combination with the Retirement System's amortization policy, affects the timing and amounts of future contributions. The amounts of future contributions will most certainly differ from those assumed in this report due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement in this report of 100% is not synonymous with no required future contributions. Even though the funded status is over 100%, the Retirement System would still require future normal cost contributions (i.e., contributions to cover the cost of active membership accruing an additional year of service credit).
3. The measurement would produce a different result if the Market Value of Assets (MVA) were used instead of the FVA, unless the MVA is used in the measurement.

Limitations of Project Scope

Actuarial standards do not require the actuary to evaluate the ability of the plan sponsor or other contributing entities to make required contributions to the plan when due. Such an evaluation was not within the scope of this project and is not within the actuary's domain of expertise. Consequently, the actuary performed no such evaluation.

Statement by Enrolled Actuary

Statement by Enrolled Actuary: "This actuarial valuation was prepared and completed by me or under my direct supervision, and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate, and in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Part VII, Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation."

Risk Measures - Risks Associated with Measuring the Accrued Liability and Actuarially Determined Contribution

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the System's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. **Investment Risk** – actual investment returns may differ from the expected returns;
2. **Asset/Liability Mismatch** – changes in asset values may not match changes in liabilities, thereby altering the gap between the accrued liability and assets and consequently altering the funded status and contribution requirements;
3. **Contribution Risk** – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
4. **Salary and Payroll Risk** – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
5. **Longevity Risk** – members may live longer or shorter than expected and receive pensions for a period of time other than assumed; and
6. **Other Demographic Risks** – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example, if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise, if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution shown on page A-2 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

* Revised actuarial assumptions.

(5). The funded ratio is the most widely known measure of a plan's financial strength, but the trend in the funded ratio is much more important than the absolute ratio. The funded ratio should trend to 100%. As it approaches 100%, it is important to re-evaluate the level of investment risk in the portfolio and potentially to re-evaluate the assumed rate of return.

(6) and (7). The ratio of retiree liabilities to total accrued liabilities gives an indication of the maturity of the system. As the ratio increases, cash flow needs increase, and the liquidity needs of the portfolio change. A ratio on the order of 50% indicates a maturing system.

(8) and (9). The ratio of liabilities and assets to payroll gives an indication of both maturity and volatility. Many systems have ratios between 500% and 700%. Ratios significantly above that range may indicate difficulty in supporting the benefit level as a level % of payroll.

(10). The ratio of unfunded liability to payroll gives an indication of the plan sponsor's ability to actually pay off the unfunded liability. A ratio above approximately 300% or 400% may indicate difficulty in discharging the unfunded liability within a reasonable time frame.

(11) and (12). The ratio of Non-Investment Cash Flow to assets is an important measure of sustainability. Negative ratios are common and expected for a maturing system. In the longer term, this ratio should be on the order of approximately (4)%. A ratio that is significantly more negative than that for an extended period could be a leading indicator of potential exhaustion of assets.

(13) and (14). Investment return is probably the largest single risk that most systems face. The year-by-year return and the five-year geometric average both give an indication of the reasonableness of the system's assumed return. Of course, past performance is not a guarantee of future results. Market rate shown is based on an actuarial estimation method and will differ modestly from figures reported by the investment consultant.

⁽¹⁾ The minimum UAAL contribution for the City of Jacksonville is \$0.

⁽²⁾ The current amount represents the Present Value of the City of Jacksonville Beach's contributions according to their fixed contribution schedule. The City of Jacksonville Beach is actually only responsible for \$4,080,706 of UAAL, which is calculated using the initial interest rate of 7.00%.

Unfunded Actuarial Accrued Liability

	<u>October 1, 2022</u>	<u>October 1, 2021</u>
A. Actuarial present value of future benefits	\$25,230,320	\$22,599,715
B. Actuarial present value of future normal costs	<u>2,639,745</u>	<u>2,518,610</u>
C. Actuarial accrued liability	22,590,575	20,081,105
D. Funding value of assets	<u>17,630,256</u>	<u>16,717,149</u>
E. Unfunded actuarial accrued liability	<u>\$ 4,960,319</u>	<u>\$ 3,363,956</u>

The Unfunded Actuarial Accrued Liability (UAAL) is not a good measure of the System's funded status because the amount is dependent upon the actuarial cost method (please refer to page C-1). The funding progress indicators (2) and (3) on pages A-4 and A-5 are less dependent of the actuarial cost method and are a better guide to funded status and funding progress. The funded status and the funding progress indicators would be different if based on the market value of assets instead of the funding value of assets.

Chapter 175 monies are assumed to stay level in future years.

Actuarial assumptions were those used for the 10/1/2022 valuation.

Future experience was assumed to be consistent with the actuarial assumptions. If experience differs from the actuarial assumptions, future results could be significantly different from the projected results above.

Existing schedule of unrecognized investment gains and losses are reflected in this projection.

SECTION B

SUMMARY OF BENEFIT PROVISIONS AND VALUATION DATA SUBMITTED BY THE RETIREMENT SYSTEM

Summary of Benefit Provisions (as of October 1, 2022)

Normal Retirement (no reduction factor for age):

Eligibility

Members with 10 or more years of service as of July 21, 2014: 30 years of service regardless of age, or age 52 with 25 or more years of service, or age 55 with 5 or more years of service.

Members with less than 10 years of service as of July 21, 2014: 30 years of service regardless of age, or age 52 with 25 or more years of service, or age 55 with 10 or more years of service.

Mandatory Retirement Age - None.

Pension Amount

Members Not Eligible for Normal Retirement as of July 21, 2014: Total credited service times 3.0% of final average compensation. Maximum pension is 90% of final average compensation or \$90,000, whichever is less. Accrued benefits as of July 21, 2014 in excess of the maximum amount are retained.

The normal form of benefit is a benefit payable for the life of the retired member with the first 10 years guaranteed. Optional benefit forms are available on an actuarial equivalent basis. Assumptions used to calculate optional forms of payment are those in effect at the member's commencement date.

Final Average Compensation - Highest 5 years out of last 10. Compensation includes base pay plus longevity and incentive pay. Excludes overtime and all other forms of compensation.

Early Retirement:

Eligibility - 20 years of service or age 50 with 10 years of service as of July 21, 2014. Members that do not meet these conditions are not eligible for Early Retirement.

Pension Amount - Computed as regular retirement, but reduced to take into account earlier commencement of retirement income payments, as follows:

3.0% per year reduction prior to Normal Retirement

Deferred Retirement (vested benefit):

Eligibility - 10 or more years of service for members with less than 5 years of service and new hires as of July 21, 2014. Benefit begins at the earlier of: age 55 with 10 years of service, age 52 with 25 years of service, and age 65 with 5 years of service.

Members with 5 or more years of service as of July 21, 2014: 5 or more years of service. Benefit begins at regular retirement age of 55.

Pension Amount - Computed as a normal retirement but based upon service and final average compensation at time of termination.

Summary of Benefit Provisions (Continued)

Duty Disability Retirement:

Eligibility - No age or service requirements.

Pension Amount - Computed as a normal retirement to regular retirement age. Minimum benefit is not less than 50% of final average compensation. At regular retirement age, the participant has the option to have the benefit re-computed as a normal retirement with additional service credit granted from date of retirement to the later of normal retirement age or five years after date of disability. Minimum benefit is not less than 42% of final average compensation.

Non-Duty Disability Retirement:

Eligibility - 10 or more years of service.

Pension Amount - Computed as a normal retirement. Minimum benefit is not less than 25% of final average compensation.

Duty Death Before Retirement:

Eligibility - No age or service requirements.

Pension Amount - To spouse: 100% of the normal retirement benefit. Minimum benefit is not less than 35% of final average compensation.

Non-Duty Death Before Retirement:

Eligibility - 5 or more years of service for members with more than 5 years of service as of July 21, 2014. 10 or more years of service for members with less than 5 years of service and new hires as of July 21, 2014.

Pension Amount - To spouse: 100% of the normal retirement benefit.

Member Contributions: 7.95% of pay.

Cost-of-Living Adjustments: A one-time, permanent benefit increase of 2% was granted to retirees who retired before January 1, 2009. Retirees who retire after January 1, 2009 and before July 21, 2014 will receive on the 2nd anniversary of retirement, a 2% benefit increase and an additional 2% compounded annually, inclusive of certain periods and/or survivor benefits. Members who were employed on and retire after July 21, 2014 receive a 2% benefit increase for service earned before July 21, 2014 and a 1% increase for service earned after July 21, 2014, compounded annually beginning two years after retirement. Members hired after July 21, 2014 are not eligible for a COLA.

Premium Tax Monies: A distribution of property insurance premium tax monies collected by the State pursuant to Chapter 175, Florida Statutes.

Summary of Benefit Provisions (Concluded)

City Contributions: Actuarially determined amounts which together with member contributions and premium tax monies are sufficient to at least cover the requirements of the funding objective.

Forfeiture of Retirement Benefits: Retirement benefits granted by the Retirement System are subject to forfeiture if an employee is convicted of an offense specified in Sections 112.3173 and 175.195, Florida Statutes, pursuant to the procedures set forth in the cited statute.

Prior Service Purchases: A former member with credited service who wishes to return to city employment may restore the forfeited credited service to receive credit for prior service within ninety (90) days after return to city employment.

Backwards Deferred Retirement Option Program (BackDROP):

Eligibility – Same as normal retirement. Member must not be participating in the DROP on July 21, 2014 and must continue employment beyond the normal retirement date. The member may elect a BackDROP period for the number of months worked beyond their normal retirement date, up to a maximum of 36 months.

Amount of Pension – Computed as if the member had chosen to terminate on a day chosen by the member but not before the member's normal retirement date, using credited service and final average salary at the BackDROP date. In addition to the pension, there will be a lump sum payment equal to the pension benefits the member would have received had he/she retired on the BackDROP date with interest at the rate of 3.0% per year.

Claims Procedure: Claims for benefits should be filed with the Human Resources Department. If a claim is denied, you will be notified and informed of the procedure to request a hearing before the Board of Trustees. An applicant for benefits must appeal said denial within 20 days of being informed of the denial by filing an appeal with the Board Secretary. If no appeal is filed within the time period then the denial shall be final.

Disclaimer: The preceding summary briefly describes the principle benefits of the Retirement System. Detailed benefit conditions and limitations are contained in the City of Jacksonville Beach Firefighters' Retirement System Ordinance as amended, which establishes the System. The Internal Revenue Code, Florida Statutes, and the Ordinance all govern the operation of the System, and should be consulted before you take any action concerning your membership or benefits. In case of any conflict between this Summary and the Ordinance or other applicable law, the Ordinance or other applicable law will prevail. Copies of the Ordinance are available at the office of the City Clerk.

SECTION C

ACTUARIAL COST METHOD, ACTUARIAL ASSUMPTIONS AND DEFINITIONS OF TECHNICAL TERMS

Actuarial Cost Method

The actuarial cost method is a procedure for allocating the actuarial present value of benefits and expenses to time periods. The method used for your valuation is known as the individual entry-age actuarial cost method, and has the following characteristics:

- (i) The annual normal costs for each individual active member is sufficient to accumulate the value of the member's pension at time of retirement or BackDROP.
- (ii) Each annual normal cost is a constant percentage of the member's year-by-year projected pensionable compensation.

The entry-age actuarial cost method allocates the actuarial present value of each member's projected benefits on a level basis over the member's pensionable compensation between the entry age of the member and the estimated exit ages. This is based on our understanding of the approach preferred by the Florida Division of Retirement.

The portion of the actuarial present value allocated to the valuation year is called the normal cost. The portion of the actuarial present value not provided for by the actuarial present value of future normal costs is called the Actuarial Accrued Liability (AAL). Deducting accrued assets from the AAL determines the Unfunded Actuarial Accrued Liability (UAAL). The UAAL was financed as a level dollar amount.

The characteristics of this method of financing the UAAL are shown on page C-2.

Level Dollar Amortization of Unfunded Actuarial Accrued Liability

Fiscal Year Ending	UAAL Beginning of Year ^{&}	Contribution*
2023	\$4,080,706	\$707,653
2024	3,609,167	707,653
2025	3,104,620	707,653
2026	2,564,755	707,653
2027	1,987,099	707,653
2028	1,369,007	707,653
2029	707,653	707,653
2030	0	0

& Unfunded represents the remaining UAAL that the City of Jacksonville Beach is responsible for when valued at a 7% interest rate. The City of Jacksonville is responsible for the contributions to the UAAL calculated on page A-12 in excess of the City of Jacksonville Beach's contribution, in fiscal year ending 2024 this amount is \$68,415.

** Contribution is expected to be paid within 1 week of the beginning of the fiscal year.*

Actuarial Assumptions Used for the Valuation

Funding objective contribution requirements and actuarial present values are calculated by applying estimates of future plan activities (actuarial assumptions) to the benefit provisions and people information of the system, using the actuarial cost method described on page C-1. All actuarial assumptions used in this report are estimates of future experience.

The principal areas of risk which require estimates of future plan activities are:

- (i) Long-term rates of investment return to be generated by the assets of the system
- (ii) Patterns of pay increases to active members
- (iii) Rates of mortality among active members, retired members and beneficiaries
- (iv) Rates of withdrawal of active members
- (v) Rates of disability among active members
- (vi) The age patterns of actual retirements

In making a valuation, the monetary effect of each activity is calculated for as long as a present covered person survives - - a period of time which can be as long as a century.

Actual activities of the system will not coincide exactly with estimated activities, due to their nature. Each valuation provides a complete recalculation of estimated future activities and takes into account the effect of differences between estimated and actual activity to date. The result is a continual series of adjustments (usually small) to the computed contribution rate. From time-to-time one or more of the assumptions are modified to reflect experience trends (but not random or temporary year-to-year fluctuations).

The actuarial assumptions are adopted by the Board of Trustees after consultation with the actuary. In general, the actuarial assumptions were based on the System's experience, as well as experience of plans similar in nature where the System's experience was insufficient. The reasonableness of the economic assumptions was based upon capital market expectations provided by various investment consultants (including the System's) and other sources such as the Social Security Trustees report. All actuarial assumptions are based on future expectations, not market measures.

Actuarial Assumptions Used for the Valuation

The actuarial assumptions regarding the INFLATION rate, the SALARY INCREASE rates, were effective October 1, 2020. The REAL INVESTMENT RETURN was effective October 1, 2022. These actuarial assumptions are used, in combination with the other actuarial assumptions, to determine the present value of amounts expected to be paid in the future.

The annual interest rate used in making this valuation was 6.500%. It is composed of inflation and real investment return.

Price Inflation. 2.50% per annum, compounded annually. This is the rate at which growth in the supply of money and credit is estimated to exceed growth in the supply of goods and services. It may be thought of as the rate of depreciation of the purchasing power of the dollar. There are a number of indices for measuring the inflation rate. The recent inflation rate, as measured by the Consumer Price Index, has been:

	Year Ended September 30					Average	
	2022	2021	2020	2019	2018	3-Year	5-Year
Actual	8.2%	5.4%	1.4%	1.7%	2.3%	5.0%	3.8%
Assumed	2.5%	2.5%	2.5%	2.5 %	2.5%	2.5%	2.5%

Real Investment Return. 4.000% per annum, compounded annually. This is the rate of return estimated to be produced by investing a pool of assets in an inflation-free environment. Recent real investment return for the Retirement System has been:

	Year Ended September 30					Average	
	2022	2021	2020	2019	2018	3-Year	5-Year
Net Rate	3.6%	10.3%	8.3 %	8.3%	7.3%	7.4%	7.5%
Less Inflation Rate	8.2%	5.4%	1.4%	1.7%	2.3%	5.0%	3.8%
Net Real Rate	(4.6)%	4.9%	6.9 %	6.6%	5.0%	2.4%	3.7%
Target Real Rate	4.13%	4.40%	4.50%	5.25%	5.40%	4.3%	4.7%

The total investment return rate was computed using the approximate formula $i = I$ divided by $1/2 (A + B - I)$, where I is actual realized investment income plus market value adjustments, A is the beginning of year funding asset value and B is the end of year funding value of assets.

The preceding investment return rates reflect the particular characteristics of this Retirement System and should not be used to measure an investment advisor's performance or for comparison with other retirement systems. Such use will usually mislead.

Actuarial Assumptions Used for the Valuation

Salary Increases. Employee salaries are estimated to increase between the date of hire and date of retirement. Salary increases occur in recognition of (i) individual merit and seniority, (ii) inflation-related depreciation of the purchasing power of salaries, and (iii) competition from other employers for personnel.

A schedule of estimated rates of increases in individual salaries for sample ages follows:

Attributable to:	Annual Rates of Salary Increase for Sample Ages				
	20	30	40	50	60
Merit & Seniority	3.8%	2.7%	2.1%	1.1%	0.2%
General Increase in Wage Level Due to:					
Price Inflation	2.5%	2.5%	2.5%	2.5%	2.5%
Other Factors	<u>0.0%</u>	<u>0.0%</u>	<u>0.0%</u>	<u>0.0%</u>	<u>0.0%</u>
Total	6.3%	5.2%	4.6%	3.6%	2.7%

The valuation is based on a constant group size and total payroll increasing at the rate of the general increase in wage levels due to inflation and other causes, which in this case is 2.50% a year.

A schedule of recent salary change experience, as measured by average reported pay, follows:

	Year Ended September 30					Average		
	2022	2021	2020	2019	2018	3-Year	5-Year	10-Year
% Change:								
Actual ⁽¹⁾	10.3%	4.1%	(7.1)%	8.9%	(0.4)%	2.2%	3.0%	2.6%
Assumed	4.1%	4.2%	4.3%	4.3%	4.3%	4.2%	4.2%	5.0%
% Change in Total Payroll ⁽²⁾	10.3%	4.1%	(14.0)%	(3.0)%	(0.4)%	(0.4)%	(0.9)%	0.0%

⁽¹⁾ Excluding terminations and new members.

⁽²⁾ Including pays of members electing DROP participation but still working at the time of the respective valuation.

Actuarial Assumptions Used for the Valuation

	Year Ended September 30					Average	
	2022	2021	2020	2019	2018	3-Year	5-Year
Net Investment Return Rate	3.6%	10.3%	8.3%	8.3%	7.3%	7.4%	7.5%
Rate of Change in Average Pay	10.3%	4.1%	(7.1)%	8.9%	(0.4)%	2.2%	3.0%
Difference: Actual	(6.7)%	6.2%	15.4%	(0.6)%	7.7%	5.2%	4.6%
Target	4.40%	4.40%	4.50%	5.25%	5.40%	4.4%	4.8%

Mortality Table. The mortality tables used to measure retired life mortality were the Florida Retirement System (FRS) Mortality Tables, as described below:

- **Male non-disabled retiree mortality:** fully generational mortality. PUB-2010 Headcount Weighted Safety Below Median Healthy Retiree Male Mortality Table, set-forward 1 year, projected with scale MP-2018.
- **Female non-disabled retiree mortality:** fully generational mortality. PUB-2010 Headcount Weighted Safety Healthy Retiree Female Mortality Table, set-forward 1 year, projected with scale MP-2018.
- **Male employee mortality:** fully generational mortality. PUB-2010 Headcount Weighted Safety Below Median Employee Male Mortality Table, set forward 1 year, projected with scale MP-2018.
- **Female employee mortality:** fully generational mortality. PUB-2010 Headcount Weighted Safety Employee Female Mortality Table, set forward 1 year, projected with scale MP-2018.
- **Male disabled mortality:** 80% PUB-2010 Headcount Weighted General Disabled Retiree Male Mortality Table and 20% PUB-2010 Headcount Weighted Safety Disabled Retiree Male Mortality Table.
- **Female disabled mortality:** 80% PUB-2010 Headcount Weighted General Disabled Retiree Female Mortality Table and 20% PUB-2010 Headcount Weighted Safety Disabled Retiree Female Mortality Table.

PUB-2010 Fully Generational Mortality Tables				
Sample Ages in 2022	Value of \$1 Monthly for Life		Future Life Expectancy (Years)	
	Men	Women	Men	Women
50	\$157.16	\$163.99	32.55	36.38
55	147.83	155.56	27.78	31.35
60	136.25	145.39	23.18	26.55
65	122.79	133.28	18.91	22.03
70	106.73	118.84	14.89	17.77
75	88.95	102.15	11.28	13.84
80	70.48	84.06	8.19	10.37

Applicable to calendar year 2022. Values for future years are determined using the MP-2018 projection scale. The above values are for healthy participants.

The margin for future mortality improvements is included in projection scales. 75% of pre-retirement deaths were assumed to be duty related.

Actuarial Assumptions Used for the Valuation

Rates of withdrawal from active membership. The rates do not apply to members eligible to retire and do not include separation on account of death or disability. This assumption measures the probabilities of members remaining in employment.

Sample Ages	Years of Service	% of Active Members Separating During Next Year
	0	20.00%
	1	15.00%
	2	12.00%
	3	10.00%
	4	7.00%
25	5 & Over	9.90%
30		9.68%
35		7.81%
40		4.84%
45		2.53%
50		2.09%
55		2.09%
60		2.09%

These rates were first used for the October 1, 2016 valuation.

Rates of Disability. These estimates represent the probabilities of active members becoming disabled.

Sample Ages	% of Active Members Becoming Disabled During Next Year
20	0.14%
25	0.18%
30	0.20%
35	0.28%
40	0.42%
45	0.64%
50	1.04%
55	1.84%
60	3.06%

The mortality table was set-forward 10 years from the age at disability for projecting disability costs. The rates assume 75% of disabilities will be duty related. These rates were first used for the October 1, 1995 valuation.

Actuarial Assumptions Used for the Valuation

Rates of Retirement. These rates are used to measure the probabilities of an eligible member retiring during the next year.

Retirement Ages	Age Based	Yrs. of Service	Service Based	Early Retirement Ages	Early Retirement Rates
52	50%	30	100%	40	5%
53	40%			41	5%
54	30%			42	5%
55	30%			43	5%
56	20%			44	5%
57	20%			45	5%
58	20%			46	5%
59	20%			47	5%
60	100%			48	5%
				49	5%
				50-54	5%

A Fire member is eligible for normal retirement after 30 years of service, or after attaining age 52 with 25 years of service, or after attaining age 55 with 5 (10 years if less than 10 years of service as of July 21, 2014) or more years of service.

A Fire member is eligible for early retirement after 20 years of service or after attaining age 50 with 10 years of service if eligible for early retirement by July 21, 2014.

These rates were first used for the October 1, 2002 valuation.

Administrative Expenses. Administrative expenses are projected to continue at the same percent-of-payroll as experienced during the preceding fiscal year.

Investment Expenses. Investment expenses are offset against gross investment income.

Active Member Group Size. The valuation was based on a closed active member group size. This is different from previous valuations.

Vested members who terminate with a benefit worth less than 100% of their own accumulated contributions were assumed to forfeit their vested benefit.

Compensation reported for the actuarial valuation includes all amounts included in the final average compensation for benefit purposes.

Summary of Assumptions Used September 30, 2022

Pensions in an Inflationary Environment

Value of \$1,000/month Retirement Benefit to an Individual Who Retires at Age 52 in an Environment of 2.50% Inflation

Age	Value
52	\$1,000
53	976
54	952
55	929
60	820
65	724
70	640
75	566
80	500
85	442

The life expectancy of a 55-year-old male retiree is age 83. The life expectancy for a 55-year-old female retiree is age 86. Half of the people will outlive their life expectancy. The effects of even moderate amounts of inflation can be significant for those who live to an advanced age.

Summary of Assumptions Used

Miscellaneous and Technical Assumptions

Marriage Assumption. 100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits.

Pay Increase Timing. Beginning of (Fiscal) year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.

Decrement Timing. Decrements of all types are assumed to occur mid-year.

Eligibility Testing. Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

Benefit Service. Exact fractional service is used to determine the amount of benefit payable.

Decrement Relativity. Decrement rates are used without adjustment for multiple decrement table effects.

Decrement Operation. Disability and mortality decrements do not operate during the first 5 years of service. Disability and withdrawal do not operate during retirement eligibility.

Normal Form of Benefit. The normal form of benefit is a benefit payable for the life of the retired member with the first 10 years guaranteed. Optional benefit forms are available on an actuarial equivalent basis.

Loads. None.

Incidence of Contributions. Contributions are assumed to be received continuously throughout the year based upon the computed percent-of-payroll shown in this report, and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits.

Definitions of Technical Terms

Accrued Service. Service credited under the system which was rendered before the date of the actuarial valuation.

Actuarial Accrued Liability. The difference between the actuarial present value of future benefit payments and the actuarial present value of future normal costs. Also referred to as "accrued liability" or "past service liability."

Actuarial Assumptions. Estimates of expected future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement estimates (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic estimates (salary increases and investment income) consist of the underlying rates in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future benefit payments" between future normal costs and actuarial accrued liabilities. Sometimes referred to as the "actuarial valuation cost method."

Actuarial Equivalent. A single amount or series of amounts of equal actuarial present value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions.

Actuarial Present Value. The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest, and by probabilities of payment. Also referred to as "present value."

Amortization. Paying off an interest-discounted amount with periodic payments of interest and principal -- as opposed to paying off with a lump sum payment.

Experience Gain (Loss). The difference between actual actuarial costs and assumed actuarial costs -- during the period between two valuation dates.

Funding Value of Assets. Also referred to as actuarial value of assets, smoothed market value of assets, or valuation assets.

Valuation assets recognize assumed investment return fully each year. Differences between actual and assumed investment return are phased-in over a closed 4-year period. During periods when investment performance exceeds the assumed rate, valuation assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, valuation assets will tend to be greater than market value. If assumed rates are exactly realized for 3 consecutive years, valuation assets will become equal to market value.

Normal Cost. The actuarial cost allocated to the current year by the actuarial cost method. Sometimes referred to as "current service cost."

Definitions of Technical Terms

Pension Benefit Obligation. A standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The PBO is independent of the actuarial funding method used to determine contributions.

Unfunded Actuarial Accrued Liability. The difference between Actuarial Accrued Liability and the funding value of system assets. Sometimes referred to as "unfunded past service liability," "unfunded accrued liability" or "unfunded supplemental present value."

Most retirement systems have Unfunded Actuarial Accrued Liability. An amount arises each time new benefits are added and each time an experience loss occurs.

The existence of Unfunded Actuarial Accrued Liability is not in itself bad, any more than a mortgage on a house is bad. Unfunded Actuarial Accrued Liability does not represent a debt that is payable today. What is important is the ability to control the amount of Unfunded Actuarial Accrued Liability and the trend in the amount (after due allowance for devaluation of the dollar).

SECTION D

ADDITIONAL DISCLOSURE INFORMATION

GASB Statements No. 67 and No. 68 are the accounting standards which replaced GASB Statements No. 25 and No. 27. GASB Statement No. 67 was first effective for fiscal year 2014 and GASB Statement No. 68 was first effective for fiscal year 2015. A separate GASB Statements No. 67 and No. 68 report has been issued outside of this report. This section contains historical GASB Statements No. 25 and No. 27 reporting information for prior fiscal years and illustrative information for fiscal year 2015 and after.

Contributions Required and Contributions Made

The City's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are designed to accumulate sufficient assets to pay benefits when due. The normal cost and Actuarial Accrued Liability (AAL) are determined using an entry-age actuarial funding method. Unfunded Actuarial Accrued Liability (UAAL) is being amortized as a level dollar over a period of 10 years starting with the October 1, 2019 valuation (7 years remaining).

During the year ended September 30, 2022 contributions totaling \$1,225,967 -- \$1,090,782 employer and \$135,185 employee -- were made in accordance with contribution requirements determined by an actuarial valuation of the plan as of October 1, 2020. The total employer contributions consisted of \$341,463 for normal cost and administrative expenses and \$749,319 for amortization of the UAAL and \$0 for additional premium tax revenue. Employer contributions represented 52.84% of covered payroll.

Significant actuarial assumptions used to compute contribution requirements were the same as those used to compute the standardized measure of the AAL.

Computed Employer Contribution Comparative Schedule

Fiscal Year Ending September 30	Valuation Date	Contribution Rates as Percents of Valuation Payroll	Valuation Payroll	Dollar Contribution For Fiscal Year	
				Computed	Actual
2014	10/01/2012 *	18.50 %	\$ 2,065,908	\$ 408,279	\$ 457,932
2015	10/01/2013 *	18.78	1,836,131	368,361	389,997
2016	10/01/2014 *	21.15	1,867,968	422,041	422,041

* After changes in benefit provisions and/or actuarial assumptions.

Actuarial Accrued Liability

The Actuarial Accrued Liability (AAL) is a measure intended to help users assess (i) a pension fund's funded status on a going-concern basis, and (ii) progress being made toward accumulating the assets needed to pay benefits as due. Allocation of the actuarial present value of projected benefits between past and future service was based on service using the individual entry-age actuarial cost method. Assumptions, including projected pay increases, were the same as used to determine the Fund's level dollar annual required contribution between entry-age and assumed exit age. Entry-age was established by subtracting credited service from current age on the valuation date.

The preceding methods comply with the financial reporting standards established by the Governmental Accounting Standards Board (GASB).

The entry age AAL was determined as part of an actuarial valuation of the plan as of October 1, 2022. Significant actuarial assumptions used in determining the entry age AAL include (a) a rate of return on the investment of present and future assets of 6.500% per year compounded annually, (b) projected salary increases of 2.50% per year compounded annually, 2.50% attributable to inflation and 0.00% attributable to other causes, (c) additional projected salary increases of 3.8% to 0.0% per year, depending on age, attributable to seniority/merit, and (d) the assumption that benefits will not increase after retirement.

As of October 1, 2022, the Unfunded Actuarial Accrued Liability (UAAL) was \$4,960,319 determined as follows:

Actuarial Accrued Liability:	
Active participants (23 vested and 2 non-vested)	\$ 12,359,203
Retired participants and beneficiaries currently receiving benefits (23 vested)	9,874,554
Vested terminated participants not yet receiving benefits (1 vested)	340,247
Prepaid Contribution Reserve	16,571
Total Actuarial Accrued Liability	22,590,575
Actuarial Value of Assets (market value was \$15,626,702)	17,630,256
Unfunded Actuarial Accrued Liability	\$ 4,960,319

During the year ended September 30, 2022 the Plan experienced a net change of \$2,509,470 in the AAL. The AAL increased by \$349,798 due to the assumed rate of interest being updated from 6.675% to 6.50%. There were no changes in benefit provisions or methods.

Supplementary Information Schedule of Funding Progress

Actuarial Valuation Date October 1	Actuarial Value of Assets [#] (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (b)-(a)	Funded Ratio (a)/(b)	Active Participant Covered Payroll (c)	Unfunded AAL as a Percentage of Active Member Covered Payroll ((b-a)/c)

2022 *	17,630	22,591	4,961	78.0	2,064	240.3

Dollar amounts are in thousands.

* After changes in benefits and/or actuarial assumptions and/or actuarial cost methods.

The Actuarial Value of Assets is a four-year smoothed market value.

Analysis of the dollar amounts of Actuarial Value of Assets (AVA), Actuarial Accrued Liability (AAL), or Unfunded Actuarial Accrued Liability (UAAL) in isolation can be misleading. Expressing the AVA as a percentage of the AAL provides one indication of the System's funded status on a going-concern basis. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage the stronger the plan. The UAAL and annual covered payroll are both affected by inflation. Expressing the UAAL as a percentage of covered payroll approximately adjusts for the effects of inflation and aids analysis of the progress being made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage the stronger the plan.

Required Auditor Communications
Fiscal Year Ended September 30, 2022

Presented by:
Barbara Boyd, CPA
Partner

Meagan Camp, CPA
Senior Manager

PURVIS
GRAY

Required Communications

- Unmodified Opinion on the Financial Statements
- Other Required Communications:
 - Accounting Practices, Policies and Estimates
 - Significant accounting practices and policies: no changes from prior years
 - Sensitive Disclosures – Note 5:
 - Detail of Total and Net Pension Liability and Fiduciary Net Position
 - Description of Actuarial Assumptions
 - Significant accounting estimates:
 - Fair Value of Investments
 - Actuarial assumptions used in estimating Annual Pension Cost and the Total Pension Liability
 - Difficulties Encountered During the audit – none noted
 - Corrected and Uncorrected Misstatements – none noted
 - Disagreements with Management – none noted

Financial Statements

- Independent Auditors' Report
- Management's Discussion and Analysis
- Basic Financial Statements and Notes
- Required Supplementary Information (RSI)

Statement of Fiduciary Net Position

- Reports on a pension plan's financial position as of the end of the fiscal year.

To the Trustees of
The City of Jacksonville Beach, Florida
Firefighters' Retirement System
Honorable Mayor and Members of the City Council
Jacksonville Beach, Florida

Opinion

We have audited the accompanying statement of fiduciary net position of the City of Jacksonville Beach, Florida, Firefighters' Retirement System (the FFRS), a fiduciary component unit of the City of Jacksonville Beach, Florida, as of September 30, 2022, and the related statement of changes in fiduciary net position for the year then ended, and the related notes to the financial statements, which collectively comprise the FFRS's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the FFRS as of September 30, 2022, and the changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the FFRS, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the FFRS's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

INDEPENDENT AUDITOR'S REPORT

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the FFRS's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the FFRS's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

INDEPENDENT AUDITOR'S REPORT

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

MANAGEMENT'S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Jacksonville Beach, Florida (the City) Firefighters' Retirement System (the Plan) provides an overview of the financial activities and funding conditions for the fiscal year ended September 30, 2022.

Financial Highlights

- The Plan's total net position held in trust for the payment of benefits and to meet the Plan's future obligations to its members and their beneficiaries was \$15,626,702. The Plan's net position decreased by \$-2,569,516, a -14.12% decrease for the year.
- Employer contributions to the Plan increased \$248,990 from the previous year. The actual employer contributions were \$1,090,782 for 2022, and \$841,792 for 2021, including contributions from the City of Jacksonville of \$410,437 for 2022 and \$134,139 for 2021. The increase is attributable to the net effect of a decrease in the actuarially calculated contribution requirement for 2022 combined with a deficiency in required contribution carried forward from 2021. Additionally, the City of Jacksonville did not remit the contributions from the State of Florida for 2021.
- The net investment income decreased by \$-5,716,623 compared to 2021. The actual results were \$-2,881,425 for 2022, and \$2,835,198 for 2021. Investment income decrease due to a decrease in performance compared to the previous year.
- Benefit payments and refund of contributions decreased by \$-3,466 compared to 2021. The benefit payments and refund of contributions were \$536,482 for 2022, and \$839,948 for 2021. The decrease is primarily attributable to fewer payouts than the previous year.

On November 18, 2019, the City entered into an interlocal agreement with the City of Jacksonville to provide fire services to the residents and businesses of the City. Effective November 23, 2019, the City's firefighters became employees of the City of Jacksonville. At that time, the FFRS was closed to new members. Each firefighter in active service on the effective date was given the opportunity to individually elect to continue participating in the FFRS or join the City of Jacksonville's defined contribution retirement plan. Those who elected to continue participating in the FFRS or join the City of Jacksonville's defined contribution retirement plan must continue to make legally required contributions and accrue service benefits under the Plan for as long as they are employed as certified firefighters by the City of Jacksonville.

Pension plan provisions for the FFRS were modified significantly in fiscal year 2014 to improve the Plan's financial sustainability. The modifications included increasing the employee's contribution rate, changing the vesting periods, modifying pensionable pay exclusions, and modifying the Deferred Retirement Option Program (DROP). Details of the changes can be found in the Notes to the Financial Statements beginning on page 13. The funding objective of the Plan is to meet its long-term pension benefit obligations through employer and employee contributions and investment returns. The Plan fiduciary net position as a percentage of total pension liability was 74.47% as of September 30, 2022.

Financial Analysis

The following discussion and analysis are intended to serve as an introduction to the City of Jacksonville Beach, Florida, Firefighters' Retirement System financial statements, which are comprised of the Statement of Fiduciary Net Position, the Statement of Changes in Fiduciary Net Position, Notes to Financial Statements, and certain required supplementary information.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The financial statements reflect the activities of the Firefighters' pension plan and are reported in the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position. These statements are presented on a full accrual basis and reflect all trust activities as incurred.

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning the City's progress in funding its obligation to provide pension benefits to its employees.

In 2014, the City implemented Governmental Accounting Standards Board Statement (GASB) No. 67 as required for the Plan. This statement requires additional disclosures in the Plan's financial statements. The statement also requires the net pension liability to be measured as of the Plan's most recent fiscal year-end using methods prescribed by GASB that differ significantly from previous methods. The required disclosures for the Plan can be found in the Notes to Financial Statements beginning on page 13 and the Required Supplementary Information beginning on page 23.

There are several ways to measure the Plan's financial status. One means is to determine the Plan's net position available to pay benefits. This is the difference between total assets and total liabilities. Another way is to refer to the Plan's Net Pension Liability, which takes into account the total pension liability and the Plan fiduciary net position. The chart below displays the Plan fiduciary net position as a percentage of total pension liability for the past three years.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The funding objective of the Retirement System is to establish and receive contributions (expressed as a percent of active member payroll), which should remain level from year-to-year and not have to be increased for future generations of citizens in the absence of benefit improvements. The Retirement System is supported by member contributions, City contributions, and investment income from the Retirement System assets as displayed on the chart below.

Actuarial valuation differences between actual and assumed investment return are phased-in over a closed four-year period. Therefore, during periods when investment performance exceeds the assumed rate, asset values will tend to be less than market value. Conversely, during periods when investment performance is less than the assumed rate, valuation assets will tend to be greater than market value. As of October 1, 2021, the date of the last actuarial valuation, the Plan had a market value of \$18,196,218 and a funding value of \$16,717,149 as shown in the chart below.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Market/Funding Value of Assets

Plan Year Ended 9-30	Market Value	Funding Value
2012	\$ 8,979,198	\$ 8,887,626
2013	10,097,893	9,701,319
2014	10,946,306	10,437,534
2015	10,699,823	11,134,615
2016	11,141,492	11,525,665
2017	12,312,108	12,223,477
2018	13,344,201	13,027,802
2019	13,386,114	13,900,598
2020	15,276,169	15,068,979
2021	18,196,218	16,717,149

The Statement of Fiduciary Net Position is a snapshot of account balances at year-end. It indicates the assets available for future payments to retirees and any current liabilities that are owed at this time.

Fiduciary Net Position Restricted for Pension Benefits as of September 30

	2022	2021	Increase/ (Decrease)
Cash and Short-Term Investments	\$ 1,050,756	\$ 1,348,969	\$ (298,213)
Due from Other Government Units		90,000	(90,000)
Miscellaneous Receivable	1,848		1,848
Interest Receivable	16,922	10,352	6,570
Investments	14,557,455	16,747,137	(2,189,682)
Total Assets	<u>15,626,981</u>	<u>18,196,458</u>	<u>(2,569,477)</u>
Other Accrued Liabilities	279	240	39
Total Liabilities	<u>279</u>	<u>240</u>	<u>39</u>
Net Position Restricted for Pension Benefits	<u>\$ 15,626,702</u>	<u>\$ 18,196,218</u>	<u>\$ (2,569,516)</u>

The net position of the Plan as of September 30, 2022, was \$15,626,702. The allocation of the Plan's total assets as of September 30, 2022, is shown on the pie chart on the following page.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Revenues essential to funding the Plan are obtained from member contributions, City contributions, State premium tax distributions, and investment income from the retirement system assets. For the Plan year ended September 30, 2022, Plan participants were required to pay 7.95% of their annual pensionable salary to the Plan. The City makes periodic contributions totaling 100% of the annual actuarially determined amount to the Plan.

The Statement of Changes in Fiduciary Net Position provides a view of current year additions to and deductions from the Plan's net position. Total Plan deductions were more than the sum of net investment earnings and contributions, resulting in an overall -14.12% decrease in Plan net position for the year. Earnings or losses on investments are reported net of investment expenses. The following table shows a comparative summary of the changes in net position and reflects the Plan's activities for the fiscal years ended September 30.

Changes in Fiduciary Net Position for the Year Ended September 30

	2022	2021	Increase/ (Decrease)	Percentage Change
Additions:				
Contributions	\$ 1,225,967	\$ 1,000,373	\$ 225,594	22.55%
Net Investment Earnings	(2,881,425)	2,835,198	(5,716,623)	-201.63%
Total Additions, Net	(1,655,458)	3,835,571	(5,491,029)	-143.16%
Deductions:				
Benefits and Refunds	836,482	839,948	(3,466)	-0.41%
Administrative Expenses	77,576	75,574	2,002	2.65%
Total Deductions	914,058	915,522	(1,464)	-0.16%
Change in Net Position	(2,569,516)	2,920,049	(5,489,565)	-188.00%
Beginning of Year Net Position	18,196,218	15,276,169	2,920,049	19.12%
End of Year Net Position	\$ 15,626,702	\$ 18,196,218	\$ (2,569,516)	-14.12%

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Plan's investment earnings result from market gains and losses on investments during the year as well as dividend and interest earnings.

Additions to the Fiduciary Net Position

The monies to pay benefits are accumulated from the contributions made from employers, employees, State distributions of Chapter 175 premium taxes (in prior fiscal years), and income generated from the Plan's investments. Earnings or losses on investments are reported net of investment expenses.

	2022	2021	Increase/ (Decrease)
Additions:			
Employee Contributions	\$ 135,185	\$ 158,581	\$ (23,396)
Employer Contributions	1,090,782	841,792	248,990
Net Investment Income	(2,881,425)	2,835,198	(5,716,623)
Total Additions	<u>\$ (1,655,458)</u>	<u>\$ 3,835,571</u>	<u>\$ (5,491,029)</u>

Deductions from the Fiduciary Net Position

The Plan provides a lifetime pension benefit to its retired members, as well as survivor, and disability benefits. Annual expenses to the Plan include retirement benefits, DROP distributions, refunds of employee contributions, and administrative expenses.

	2022	2021	Increase/ (Decrease)
Deductions:			
Benefits	\$ 836,482	\$ 839,948	\$ (3,466)
Administrative Expenses	77,576	75,574	2,002
Total Deductions	<u>\$ 914,058</u>	<u>\$ 915,522</u>	<u>\$ (1,464)</u>

The benefit payments are payments to retirees, or their beneficiaries (if the retiree is deceased). Administrative expenses include all expenses necessary to administer the retirement plan.

Notes to Financial Statements and Required Supplementary Information

Notes to financial statements provide additional information that is essential to a full understanding of the data provided. They begin on page 13 of this report.

MANAGEMENT'S DISCUSSION AND ANALYSIS

GASB Statement No. 67 requires several schedules of historical trend information to be presented as required supplementary information immediately after the notes to the financial statements. The required schedules are: (a) a schedule of changes in the net pension liability and related ratios multi-year that presents the beginning and ending balances of the total pension liability, the pension plan's fiduciary net position, the net pension liability and the effects on those items; (b) a schedule of net pension liability multi-year; (c) a schedule of the City's contributions that identifies whether the information relates to employers, non-employers, or both; and (d) a schedule of investment returns that provides information about the annual money-weighted rate of return on pension plan investments.

These schedules contain information pertaining to the City of Jacksonville Beach, Florida, Firefighters' Retirement Systems' actuarial methods and assumptions, including data on the investment returns of the Plan. They can be found on pages 23-26.

Plan Membership

The table below reflects the Plan membership as of September 30 for active participants, retirees, beneficiaries, disabled members, DROP members, and terminated vested members.

	September 30, 2022	September 30, 2021	Change
Vested	23	23	
Non-Vested	2	2	
Total Active Participants	25	25	
Retirees Receiving Benefits	14	14	
Beneficiaries Receiving Benefits	6	6	
Disability Benefits	3	3	
Total Receiving Benefits	23	23	
Terminated Vested Members	1	1	
Total Members Currently Receiving Benefits and Terminated Employees Entitled to Benefits, But Not Yet Receiving Them	24	24	

Funding Status

Of primary concern to most pension plan participants is the amount of money available to pay benefits. Historically, defined benefit pension plans have been under-funded when the employer failed to make annual actuarially required contributions to the plan. The City's defined benefit plan has been subject to the minimum funding standards since the adoption of the *Florida Protection of Public Employee Retirement Benefits Act* (Part VII of Chapter 112, Florida Statutes) in 1980. In addition, the Firefighters' Pension Plan is eligible to receive a distribution of casualty premium tax monies from the State of Florida pursuant to Chapter 175, Florida Statutes, which is passed through from the City of Jacksonville. Accordingly, the City has funded the actuarially determined contribution for each year as required.

Request for Information

The financial report is designed to provide users with an overview of the Plan's finances and the prudent exercise of the Board's oversight. Questions concerning this report should be addressed to the City's Finance Officer, 11 North Third Street, Jacksonville Beach, Florida 32250.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIIGHTERS' RETIREMENT SYSTEM

Note 1 - Description of Plan

Reporting Entity

The City of Jacksonville Beach, Florida Firefighters' Retirement System (the FFRS) was formed on April 1, 2000, as a result of amendments to the Florida Statutes. Chapter 175.061 governing Firefighters' pensions and Chapter 185.05 governing Police Officers' pensions were amended to require separate pension plans for each of these groups of employees. On March 31, 2000, the predecessor pension plan (the Public Employees' Retirement System) ceased operations and its assets, liabilities, and fund balance were divided among three distinct pension plans:

- General Employees' Retirement System
- Police Officers' Retirement System
- Firefighters' Retirement System

Plan Description

On November 18, 2019, the City of Jacksonville Beach (the City) entered into an interlocal agreement with the City of Jacksonville to provide fire services to residents and businesses of the City effective November 23, 2019. On the agreement's effective date, the City's firefighters became employees of the City of Jacksonville. At this time, the FFRS was closed to new members. Each firefighter in active service on the effective date was given the opportunity to individually elect to continue participating in the FFRS or join the City of Jacksonville's defined contribution retirement plan. Those who elected to continue participating in the FFRS must continue to make legally required contributions and accrue service benefits under the Plan for as long as they are employed as certified firefighters by the City of Jacksonville.

The City will continue to be the plan sponsor and is responsible for the unfunded actuarial accrued liability as determined by the plan actuary as of November 22, 2019. The City has agreed to pay the unfunded liability at that time, which totaled \$5,318,174, into the FFRS over a 10-year period. Annual contributions to the Plan total \$707,653. The City of Jacksonville is responsible for paying the total required contribution to the FFRS and estimated annual employee contributions. Although the FFRS presents separate financial statements, it is a fiduciary component unit (reported as a pension trust fund) of the City.

Prior to November 23, 2019, covered individuals under the FFRS included all employees hired by the City for the position of Firefighter budgeted for 1,000 or more hours work in a year, except as follows:

- Reserve Firefighters
- Fire Chief, Unless Specifically Elected to Participate

The FFRS is the administrator of a single-employer, defined benefit pension plan and, as it relates to Firefighters, is the successor entity for the plan that was established by the City on November 1, 1951, in accordance with a State of Florida legislative act which amended Chapter 27-643, Laws of Florida, 1951.

The FFRS is administered by a Board of Trustees (the Board) comprised of two residents of the City appointed by City Council, two members of the FFRS elected by the membership, and a fifth member elected by the other four Board Members.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

Membership

As of October 1, 2021 (date of the latest annual actuarial valuation), employee membership data related to the Pension Plan were:

Inactive Plan Members or their Beneficiaries Currently	
Receiving Benefits	23
Inactive Plan Members Entitled to Benefits,	
But Not Yet Receiving Them	1
Active Plan Members	<u>25</u>
Total	<u><u>49</u></u>

Benefits

The Pension Plan provides retirement benefits, deferred vested benefits, and death and disability benefits. The Plan assets are available to pay firefighters. Pension Plan provisions for the FFRS were modified significantly in fiscal year 2014. The modifications included increasing the employees' contribution rate, changing the vesting periods, modifying pensionable pay exclusions, and modifying the Deferred Retirement Option Program. The chart below provides a comparison of the Pension Plan provisions that occurred in fiscal year 2014. In addition, the paragraphs following the chart provide a detailed description of the changes.

SUMMARY COMPARISON OF PENSION PROVISIONS

CITY OF JACKSONVILLE BEACH FIREFIGHTERS' PENSION PLAN					
Provision	Employees Hired After July 21, 2014	Employees with Less Than 5 Years of Service on July 21, 2014	Employees with at Least 5 Years of Service but Less Than 10 Years of Service on July 21, 2014	Employees with 10 or More Years of Service on July 21, 2014	Employees with 30 Years of Service; Age 52 with 25 Years of Service; Age 55 with 5 Years of Service on July 21, 2014
Benefit Formula	3% for all years of service (\$90,000 or 90% maximum)				3% - first 30 years; 2% thereafter (100% maximum)
Normal Retirement Date	Age 52 with 25 years of service; or Age 55 with 10 years of service; or 30 years of service regardless of age			Age 52 with 25 years of service; or Age 55 with 5 years of service; or 30 years of service regardless of age	
Pensionable Pay	Base pay + longevity pay + incentive pay; excluding overtime, leave payouts, and all other compensation				Base pay, longevity, overtime, shift differential, and incentive pay
COLA	No COLA	2% increase on benefits earned prior to the effective date; 1% annual increase on benefits earned after the effective date			2% increase on 2 nd anniversary and annually thereafter

- **Normal Retirement**—Plan participants who retired prior to October 1, 1990, are entitled to pension payments for the remainder of their lives equal to 2-1/2% of their final average compensation times the number of years they were employed by the City. The final average compensation is the highest five out of last ten years of employment. Compensation includes longevity pay, shift differentials, and incentive pay. The maximum annual pension payment to these participants is 75% of their final five-year average compensation.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIIGHTERS' RETIREMENT SYSTEM

Plan participants who retired after September 30, 1990 but before July 21, 2014, are entitled to pension payments for the remainder of their lives equal to 3% of their final average compensation times the number of years they were employed by the City up to a maximum of 30 years. After 30 years, the pension benefit is reduced to 2% of their final average compensation times the number of years of service over 30 years. A maximum annual pension benefit to these employees is 100% of their final average compensation.

Plan participants who retire on or after July 21, 2014, are entitled to payments for the remainder of their lives equal to 3% of their final average compensation times the number of years they were employed by the City up to a maximum of \$90,000 or 90%, whichever is less. Accrued benefits in excess of the maximum amount are retained by the Plan. Compensation includes base pay, longevity pay, incentive pay, but excludes overtime and all other forms of compensation.

Eligibility requirements for normal retirement are as follows for participants with ten years of service on July 21, 2014: 30 years of service regardless of age, or age 52 with 25 or more years of service, or age 55 with five years of service.

Eligibility requirements for normal retirement are as follows for participants with less than ten years of service on July 21, 2014: 30 years of service regardless of age, or age 52 with 25 or more years of service, or age 55 with ten years of service. There is no mandatory retirement age.

The normal form of benefit is a benefit payable for the life of the retired member with the first ten years guaranteed. Optional benefit forms are available on an actuarial equivalent basis.

- **Early Retirement**—Early Retirement is available with a reduced benefit only to participants age 50 with 10 or more years of service or 20 years of service as of July 21, 2014. Members that do not meet these conditions are not eligible for early retirement.
- **Non-Duty Disability Retirement**—Disability retirement is available to Plan participants that have attained at least ten years of service. Until the Plan participant reaches normal retirement age, the minimum non-duty disability is 25% of the participants' final average compensation.
- **Duty Disability Retirement**—The ten-year service requirement is waived if the retirement is caused by a duty-related disability. The amount of a duty disability pension is the larger of the members accrued pension and 50% of the members final average compensation. At regular retirement age, the participant may elect to continue to be covered by duty disability or have the benefit recomputed as a normal retirement with additional service credit granted from the date of retirement to the later of normal retirement age or five years after date of disability. The minimum benefit shall not be less than 42% of the participants' final average compensation.
- **Non-Duty Death Before Retirement**—Non-duty death benefits are available at 100% of the Plan participant's normal retirement benefit provided the Plan participant attained ten or more years of service.
- **Duty Death Before Retirement**—The ten-year service requirement is waived if the death is duty-related. The surviving spouse is entitled to receive 100% of the participants' normal retirement benefit. The minimum benefit to the spouse shall not be less than 35% of the participants' final average compensation.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIIGHTERS' RETIREMENT SYSTEM

- **Backwards Deferred Retirement Option Program (BackDROP)**—A participant of the retirement system who meets the normal retirement requirements on or after July 21, 2014, is eligible for BackDROP. The participant may elect a BackDROP period for the number of months employed beyond their normal retirement date, up to a maximum of thirty-six consecutive months. Benefits are computed as if the participant chose to terminate on any date within the thirty-six-month period after the normal retirement date, using credited service and final average compensation at the normal retirement date. In addition to the monthly pension, there will be a lump-sum payment. The lump-sum payment will be computed as if the monthly benefits had started and were accumulated in an account and credited with 3% interest, compounded annually during the period between the date chosen for BackDROP retirement and the date of termination.
- **Cost of Living Adjustments (COLA)**—A one-time, permanent benefit increase of 2% was granted to retirees who retired before January 1, 2009. Retirees who retired after January 1, 2009 but before July 21, 2014, will receive on the second anniversary of retirement, a 2% benefit increase and an additional 2% compounded annually, inclusive of certain periods and/or survivor benefits. Retirees who were employed on and retire after July 21, 2014, receive a 2% COLA increase for service earned before July 21, 2014, and 1% COLA increase for service earned after July 21, 2014, compounded annually beginning two years after retirement. Retirees hired after July 21, 2014, are not eligible for a COLA.

Contributions

For the year ended September 30, 2022, Plan participants were required to pay 7.95% of their annual compensation to the Pension Plan. The payments are deducted from the employees' wages or salary and remitted by the City of Jacksonville after November 23, 2019, to the FFRS at the end of each pay period. If an employee leaves the employment of the City of Jacksonville before he or she is vested (attaining five years of service prior to July 21, 2014, or attaining ten years of service on or after July 21, 2014), the accumulated contributions plus earned interest are refunded to the employee or the employee's designated beneficiary. If an employee leaves the employment of the City of Jacksonville after becoming vested, but before attaining retirement age, the employee or the employee's designated beneficiary has the option of being refunded the accumulated contributions plus earned interest or keeping the funds in the Plan and receiving benefits under the Plan upon reaching normal retirement age.

As per the Fire Services Agreement, the City and the City of Jacksonville make the total required contribution as determined by the Plan actuary on or before October 15 of each year. In addition, the Plan typically receives an annual distribution of property insurance premium tax monies from the State of Florida pursuant to Chapter 175, Florida Statutes. However, for the year ended September 30, 2021, the City of Jacksonville did not remit the funds received from the State of Florida to the Plan. This deficiency was corrected during the year ended September 30, 2022. For the year ended September 30, 2022, the actuarially determined contribution amount as determined by the October 1, 2020 actuarial valuation was \$968,663 (\$680,045 City, \$121,298 City of Jacksonville, and \$167,320 State of Florida). The actual contribution was \$1,090,782 (\$680,345 City, \$101,725 City of Jacksonville, and \$308,712 State of Florida, which includes remediation of the \$141,392 prior year deficiency). The actuarially required contribution for the City was decreased by \$27,308 for the year ended September 30, 2022, as the result of the identification by the actuary of a previously unapplied prepaid contribution.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

For the year ended September 30, 2022, the total covered payroll (Firefighters only) amounted to \$2,064,469. Covered payroll refers to all compensation paid by the City to active employees covered by the FFRS on which contributions to the Pension Plan are based.

Note 2 - Summary of Significant Accounting Policies and Plan Position Matters

Basis of Accounting

The FFRS financial statements are prepared on the accrual basis of accounting. Contributions from the City and the City's employees are recognized as revenue in the period in which employees provide services to the City. Interest and dividend income is recognized when earned by the Pension Plan. Realized gains and losses on the sale of investments held by the Pension Plan are recognized when incurred. Net appreciation in the fair value of investments held by the Pension Plan is recorded as an increase to investment income based on the valuation of investments as of the date of the statement of plan net position available for benefits. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

Investments

Investments in securities are reported at fair value. Corporate bond securities are assigned a value based on yields currently available on securities of issuers with credit ratings similar to the securities held by the Pension Plan. Unrestricted capital stock securities are assigned a value based on quoted market prices. There are no investments in, loans to, or leases with parties related to the Pension Plan.

Note 3 - Cash and Investments

Chapter 175 of the Florida Statutes authorizes the FFRS to invest in time and savings accounts of a bank or a savings and loan association insured by the Federal Deposit Insurance Corporation. In addition, other Florida statutes and City ordinances authorize the FFRS to invest in obligations of the United States; in obligations guaranteed as to principal and interest by the United States; and in bonds, stocks, or other evidences of indebtedness issued or guaranteed by a corporation organized under the laws of the United States provided that the corporation is listed on one or more of the recognized national stock exchanges and holds a rating of the three highest classifications by a major rating service. Corporate fixed income securities must hold a rating of A or higher by a Nationally Recognized Statistical Rating Organization (Moody's, Standard & Poor's, Fitch).

Following is a summary of the investments and maturities held by the FFRS at September 30, 2022:

Investment Type	Fair Value	Investment Maturities (In Years)			
		Less Than 1	1-5	6-10	More Than 10
Mutual Fund (Equities)	\$ 9,954,348	\$ 9,954,348			
U.S. Government Securities	1,029,061		\$ 181,023	\$ 635,855	\$ 212,183
Federal Agency Securities:					
Federal Farm Credit Bank	213,634		14,859		198,775
Federal Home Loan Bank	33,818			33,818	
Federal Home Loan Mortgage Corporation	71,361		202		71,159
Federal National Mortgage Association	1,041,752	121	7,265	44,568	989,798
Corporate Bonds	1,179,961		390,350	789,611	
Real Estate Fund	1,033,520	1,033,520			
Total	\$ 14,557,455	\$ 10,987,989	\$ 593,699	\$ 1,503,852	\$ 1,471,915

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

Credit quality distribution for the FFRS investments with credit exposure as a percentage of the total pension investment is as follows:

<u>Investment Type</u>	<u>Moody's Credit Rating</u>	<u>Percent of Total</u>
U.S. Government Securities	Aaa	7.07%
Federal Agency Securities	Aaa	9.35%
Corporate Bonds	A1	2.29%
Corporate Bonds	A2	2.40%
Corporate Bonds	A3	1.19%
Corporate Bonds	Aa2	0.14%
Corporate Bonds	Aa3	0.58%
Corporate Bonds	Baa1	1.51%

Cash and money market funds totaling \$1,050,756 at September 30, 2022, are classified as cash and short-term investments on the accompanying statement of fiduciary net position because they are available for immediate withdrawal or transfer.

Risk Disclosure

The Plan's investment policies do not specifically address its exposure to interest rate changes, custodial credit risk, or quality credit risk. The following items discuss the pension funds' exposure to various risks in primarily the fixed rate portions of their investment portfolios:

- **Interest Rate Risk**—the City's pension funds limit their risk by averaging investment maturities at approximately three to five years.
- **Custodial Credit Risk**—for an investment, custodial credit risk is the risk that in the event of the failure of the counterparty, the fund will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The fund generally utilizes third-party custodians to help manage custodial credit risk.
- **Concentration of Credit Risk**—the pension funds' investment policies and practices require investments to be diversified to the extent practicable to control the risk of loss resulting from overconcentration of assets in a specific maturity, issuer, instrument, dealer, or bank through which financial instruments are purchased and sold.

Identification of Investments

- **Equities**—Investments in equity securities must be traded on the national exchange or electronic network. No more than 5% of the Plan's assets, at the time of purchase, may be invested in the common stock, capital stock, or convertible stock of any one issuing company. In addition, the aggregate investment in any one company shall not exceed 5% of the outstanding capital stock of that company. No more than 10% of the Plan's assets, at the time of purchase, may be invested in the shares of companies that have been publicly traded for less than one year.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

- **Fixed Income**—Investments in corporate fixed income securities shall be limited to those securities rated “A” (or its equivalent) or higher by a Nationally Recognized Statistical Rating Organization. In the event an investment security rating drops below a rating of A, the investment manager notifies the investment advisor. The investment advisor instructs the investment manager to monitor the investment closely or dispose of it when economically feasible. The maximum maturity of any single security in the Plan’s fixed income portfolio shall not exceed 30 years, and the average effective duration of the portfolio shall not exceed that of the benchmark index by more than 20%. No more than 10% of the Plan’s assets, at the time of purchase, shall be invested in securities of any single corporate issuer. Investments in Collateralized Mortgage Obligations (CMO) shall be limited to 10% of the market value of the Plan’s fixed income portfolio and shall be restricted to those issues that are currently paying interest, receiving principal pay-downs and do not contain leverage.
- **Real Estate Fund**—All real estate investments shall be managed by experienced and qualified professional real property investment managers. The Board will seek to diversify its real estate investment by property type (residential, industrial, office, retail, timberland, etc.) and property location (geographic region).

The following is the Board’s adopted asset allocation policy as of September 30, 2022:

<u>Asset Class</u>	<u>Target Allocation</u>
Domestic Equity	50%
International Equity	10%
Fixed Income	35%
Real Estate Fund	5%
Total	<u><u>100%</u></u>

Concentration

The Plan did not hold investments in any one organization that represents 5% or more of the Pension Plan’s fiduciary net position.

Rate of Return

For the year ended September 30, 2022, the annual money-weighted rate of return on Plan investments, net of Plan investment expense, was -16.04%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Fair Value Measurements

The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels:

- **Level 1 Inputs**—are quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date.
- **Level 2 Inputs**—are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly or indirectly.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

- **Level 3 Inputs**—are unobservable inputs for an asset or liability. The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. If a price for an identical asset or liability is not observable, a government should measure fair value using another valuation technique that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

The Plan's investments are measured at fair value on a recurring basis. Fair value measurements are categorized based on the valuation inputs used to measure an asset's fair value in the hierarchy described above. The fair value measurements for the Plan's operating investments are as follows at September 30, 2022:

		Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments by Fair Value Level	Amount			
Equities	\$ 9,954,348	\$ 9,954,348		
U.S. Government Securities	1,029,061	153,834	\$ 875,227	
Federal Agency Securities:				
Federal Farm Credit Banks	213,634		213,634	
Federal Home Loan Bank	33,818		33,818	
Federal Home Loan Mortgage Corporation	71,361		71,361	
Federal National Mortgage Association	1,041,752		1,041,752	
Corporate Bonds	1,179,961		1,179,961	
Total Investments Measured at Fair Value	13,523,935	\$ 10,108,182	\$ 3,415,753	\$ -
Investments Measured at the Net Asset Value (NAV)	Amount	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
Real Estate Fund	\$ 1,033,520	\$ -	Quarterly	45 days
Total Investments	\$ 14,557,455			

Equities and U.S. Government Securities are valued based on prices quoted in active markets and are categorized as Level 1, and Level 1 and 2, respectively, in the fair value hierarchy. Federal Agency Securities are valued using matrix pricing techniques that value securities based on their relationship to benchmark quoted prices. Corporate bonds are valued using quoted prices for similar securities in active markets and are categorized as Level 2 in the fair value hierarchy. The Real Estate Fund is valued at Net Asset Value, which is determined using certified annual appraisals of investment properties held by the fund.

Note 4 - Pension Cost

The pension cost for the year ended September 30, 2022, was \$1,090,782 (actual employer contribution). The pension cost for the 2022 fiscal year was determined as part of the October 1, 2020 roll-forward actuarial valuation using the entry age actuarial cost method.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

Note 5 - Net Pension Liability

The Pension Plan's fiscal year-end net pension liability as of September 30, 2022, was as follows:

Total Pension Liability	\$ 20,983,457
Plan Fiduciary Net Position	<u>15,626,702</u>
Net Pension Liability	<u>\$ 5,356,755</u>
Plan Fiduciary Net Position as a Percentage of Total Pension Liability	74.47%

Actuarial Assumptions

The total pension liability was determined by an actuarial valuation as of October 1, 2021, updated to September 30, 2022, using the following actuarial assumptions applied to all measurement periods.

Inflation	2.5%
Salary Increases	2.7-6.3% (Including Inflation)
Investment Rate of Return	6.625%

Mortality rates were based on 122.664(1)(a) Florida Statutes, which mandates the use of the Florida Retirement System mortality tables. The PUB-2010 table and projection scale MP-2018 uses a gender-specific mortality improvement scale. This table was first used for the October 1, 2020 valuation.

The long-term expected rate of return on the Plan investments was determined using building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Plan's target asset allocation as of September 30, 2022, are summarized below:

<u>Asset Class</u>	<u>Long-Term Expected Rate of Return (Excluding Inflation)</u>
Domestic Equity	10.0%
International Equity	11.0%
Domestic Bonds	5.0%
International Bonds	6.0%
Real Estate Fund	7.0%
Cash	0.0%

Discount Rate

The discount rate used to measure the total pension liability was 6.625%. The projection of cash flows used to determine the single discount rate assumed that Plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the Pension Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current Plan members. Therefore, the long-term expected rate of return on Pension Plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The single discount rate reflects the long-term expected rate of return on Pension Plan investments including inflation.

NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2022
CITY OF JACKSONVILLE BEACH, FLORIDA
FIREFIGHTERS' RETIREMENT SYSTEM

The table below provides the sensitivity of the net pension liability to changes in the discount rate. The table represents the Plan's net pension liability, if it were calculated using a single discount rate that is 1-percentage point lower or 1-percentage point higher than the single discount rate.

**Sensitivity of Net Pension Liability to the
Single Discount Rate Assumption**

1% Decrease	Current	1% Increase
<u>5.625%</u>	<u>Discount Rate</u>	<u>7.625%</u>
<u>6.625%</u>		
\$ 8,211,020	\$ 5,356,755	\$ 2,994,035

The total pension liability information is based on the actuarial valuation performed October 1, 2021. The total pension liability was rolled-forward from the valuation date to the Plan year ended September 30, 2022, using generally accepted actuarial principles.

Notes to Schedule:

For the 2014 fiscal year, benefit changes were determined as of the beginning of the year. Benefit terms were modified during 2014 to include longer vesting periods, changes in the benefit formula, changes in the cost of living adjustment, and changes in what is considered pensionable compensation.

- Assumption changes include the following:

For 2016, adding a 3% load on the present value of future benefits as a margin for future mortality improvements, and decreasing the long-term municipal bond rate from 3.71% to 3.06%.

For 2017, decreasing the single discount rate and long-term expected rate of return from 8.00% to 7.90%, and increasing the long-term municipal bond rate from 3.06% to 3.50%.

For 2018, decreasing the single discount rate and long-term expected rate of return from 7.90% to 7.50%, and increasing the long-term municipal bond rate from 3.50% to 3.83%.

For 2019, lowering the investment return from 7.5% to 7.0%.

For 2021, adopted the new respective Florida Retirement System mortality assumptions and lowering the investment return from 7% to 6.9%

For 2022, lowering the investment return from 6.9% to 6.625%.

COMMUNICATION WITH THOSE CHARGED WITH GOVERNANCE

To the Board of Directors of the
Firefighters' Retirement System
City of Jacksonville Beach, Florida

We have audited the accompanying statement of fiduciary net position of the City of Jacksonville Beach, Florida, Firefighters' Retirement System (the FFRS) as of September 30, 2022, and the statement of changes in fiduciary net position for the year then ended. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards as well as certain information related to the planned scope and timing of our audit. We have communicated such information to you in our engagement letter dated March 8, 2022. Professional standards also require that we communicate the following information to you related to our audit:

Significant Audit Matters

Qualitative Aspects of Accounting Practices

Accounting Policies

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the FFRS are described in Note 2 to the financial statements. No new accounting pronouncements were adopted during the year ended September 30, 2022.

We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected.

The most significant estimates affecting the financial statements were:

- Estimates of fair values of financial instruments held by the pension plan. These fair values are based upon quoted market prices or other observable inputs as described in Note 3 of the financial statements.

CERTIFIED PUBLIC ACCOUNTANTS

Gainesville | Ocala | Tallahassee | Sarasota | Orlando | Lakeland | Tampa

purvisgray.com

Members of American and Florida Institutes of Certified Public Accountants

An Independent Member of the BDO Alliance USA

To the Board of Directors of the
Firefighters' Retirement System
City of Jacksonville Beach, Florida

- The annual pension cost and the total pension liability are estimates that are calculated based on an actuarial valuation performed by a qualified actuary. The assumptions used in the valuation were determined by management and, if changed, could significantly affect the recorded amounts.

We evaluated the key factors and assumptions used to develop the estimates described above in determining that they are reasonable in relation to the financial statements taken as a whole.

Financial Statement Disclosures

Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users. The most sensitive disclosure affecting the financial statements was:

- Note 5 to the financial statements provides a detail of the total and net pension liability and plan fiduciary net position, as well as a description of the actuarial assumptions used to determine the total pension liability.

The disclosures in the financial statements are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. There were no audit adjustments identified during our audit. In addition, there were no uncorrected (passed) adjustments that came to our attention.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated April 3, 2023.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the FFRS's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

To the Board of Directors of the
Firefighters' Retirement System
City of Jacksonville Beach, Florida

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We applied certain limited procedures to Management's Discussion and Analysis and the additional schedules as listed in the table of contents as Required Supplementary Information (RSI). These schedules are considered required supplementary information that supplement the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

Restriction on Use

This information is intended solely for the use of the Board of Directors and management of the FFRS, and is not intended to be, and should not be, used by anyone other than these specified parties.

Tallahassee, Florida

Investment Performance Review
Period Ending March 31, 2023

Jacksonville Beach Retirement Systems

1st Quarter 2023 Market Environment

The Economy

- US GDP growth is expected to wane in the coming quarters as the impact from higher interest rates continues to spread through the broader economy. The final measure of 1st quarter GDP was revised downward to 1.7%. Global GDP growth also remains challenged with higher energy prices continuing to act as a headwind, especially in Europe. China has fully reopened after almost three years of COVID-19 restrictions, which boosted estimates and performance for the region.
- The US Federal Reserve Bank (the Fed) continued to increase interest rates during the quarter with two successive 0.25% increases in the Fed Funds rate in January and February. While the Fed's policy remains hawkish on fighting high inflation, the press release from the February meeting took on a more dovish tone.
- The US labor market continues to show its resiliency, adding roughly 236 thousand jobs during the 1st quarter. As a result, the unemployment rate fell to 3.5% in March. Noticeably, the labor market is showing signs of declining growth which could soon signal an inflection point in economic output and the fight against inflation.
- The global banking sector came under duress in the 1st quarter of 2023, triggered by the second and third-largest regional bank failures in US history. The combination of aggressive Fed rate hikes and questionable capital deployment by Silicon Valley Bank led to a flurry of depositor withdrawals and rocked general confidence in the overall banking system.

Equity (Domestic and International)

- US equities moved broadly higher during the 1st quarter despite concerns regarding stubbornly high inflation, the potential for additional rate hikes, slowing global GDP growth, and shaken confidence in the global banking system. Large cap growth was the best performing domestic segment of the equity market during the period while small cap value performed the worst.
- International stocks also experienced strong returns during the 1st quarter. US Dollar (USD) and local currency (LCL) performance were both solid as the USD remained largely unchanged for the quarter. Non-US GDP growth, particularly in Europe, remained under pressure as restrictive central bank policies and elevated energy prices acted as a headwind. Finally, China's reopening from its restrictive COVID-19 policies is well underway and has proven to be a greater tailwind to the region than previously expected.

Fixed Income

- While inflation continues to decline quarter-over-quarter, the Fed maintained their inflation-fighting policy stance, increasing interest rates twice, totaling 0.50%. Despite the short-term increases, yields beyond 1-year actually fell during the quarter with the bellwether US 10-Year Treasury bond closing March at 3.48%, 0.40% lower than year-end.
- Performance across domestic bond market sectors was positive during the quarter, led by corporate investment grade bonds. Global bonds slightly outperformed domestic fixed income for the quarter.
- A combination of higher coupons and narrower credit spreads were the primary drivers of lower quality corporate results during the period.
- US Treasury bonds rebounded this quarter as yields at longer maturities fell and investors fled to safety amidst troubles in the banking sector.

Market Themes

- Central banks remained vigilant in their fight against inflation with the Fed, the Bank of England, and the European Central Bank continuing on the path of raising interest rates during the quarter. However, recession fears and softening inflation readings led to a recovery in asset prices as market expectations grew there may be fewer, less drastic rate hikes going forward.
- The conflict in Ukraine continues as a major geopolitical event without a clear resolution in sight. Energy costs remain elevated, which continues to negatively impact the economic growth outlook for the region.
- Short-term interest rates rose across most developed markets as central banks continued to tighten. Despite concerns about the potential for slowing economic growth, lower-quality corporate bonds slightly outpaced higher-quality government bonds.
- Both US and international equity markets continued to recover from the disappointing year that was 2022 on expectations that inflation would continue to moderate and central banks would slow the pace of monetary tightening.

- Domestic equity markets started 2023 with solid results led by large cap companies, but each index remains negative over the trailing 1-year period. Factors contributing to the quarter's results include declining inflation readings, expectations the Fed would slow the pace of future interest rate increases, and China's economic reopening from its self-imposed COVID-19 restrictions. For the period, the S&P 500 large cap benchmark returned 7.5%, versus 4.1% for mid cap, and 2.7% for small cap benchmarks.
- Like domestic equities, international developed and emerging market equities delivered positive results for the 1st quarter. Europe continues to face headwinds from higher-than-expected inflation, elevated energy prices, geopolitical risks related to the conflict in Ukraine, and rising interest rates. Emerging markets benefited from China's return to the global economy. The developed market MSCI EAFE Index returned 8.5% for the quarter and the MSCI Emerging Markets Index rose by 4.0%.
- For the quarter, performance of the bond market was broadly positive due to lower inflation and falling yields beyond 1-year maturities. The Bloomberg (BB) US Aggregate Index returned 3.0% for the period while investment grade corporate bonds posted a moderately higher return of 3.5%.
- US equity markets were negative over the trailing 1-year period, though much of this weak performance occurred at the beginning of the timeframe and will continue to roll off in the coming quarters. The S&P 500 Index return of -7.7% for the year was largely driven by concerns related to rising inflation, tighter monetary policy, and recession fears. The weakest relative performance for the year was the Russell 2000 Index, which declined -11.6%.
- Over the trailing 1-year period, international markets also declined. The MSCI EAFE Index returned -1.4% while the MSCI Emerging Markets Index fell a much larger -10.7%. Continued concerns related to Ukraine, elevated inflation, and slowing global economic growth negatively impacted markets. However, USD weakness and easing energy prices acted as a tailwind to international performance in the second half of 2022.
- Bond markets followed a largely similar narrative to equities, finishing the trailing 1-year period in negative territory. While bond market performance was impacted by similar factors to equity market performance, the primary driver of results over the prior year was dramatically higher interest rates, which directly and immediately impact bond prices and index performance. US mortgage backed and Government issues were the least negative sectors returning -4.9% and -4.4%, respectively, for the year. US TIPS suffered the year's largest loss, falling -6.1%.

Quarter Performance

1-Year Performance

Source: Investment Metrics

- Domestic equity core benchmarks pulled back from their February highs, but each finished the quarter with solid, positive results. Concerns regarding the regional banking sector and the financial sector's large weight in the value benchmarks weighed heavily on style-based index performance. Large cap stocks led results for the capitalization-based benchmarks and finished well ahead of both the mid cap and small cap indices for the quarter. Growth benchmarks, with their lower weight in the financial sector and larger weight in the information technology sector, produced the quarter's strongest results at all capitalization levels. The Russell 1000 Growth Index topped the quarter, returning 14.4% followed by the Russell Mid Cap Growth Index and the Russell 2000 Growth Index, which rose by 9.1% and 6.1%, respectively.
- Large, mid, and small cap growth stocks each outperformed their value counterparts by a wide margin for the quarter. While it is only a single quarter, this performance reversed 2022's dominant trend of value-based benchmarks outpacing their growth counterparts. Large and mid cap stocks managed small, positive returns of 1.0% and 1.3%, respectively, for the quarter while the Russell 2000 Value Index fell -0.7%.
- The 1st quarter's positive performance was not enough to offset the challenging performance experienced by domestic equity markets during 2022. All market capitalizations and styles remain in sizable negative territory over the trailing 1-year period. Within large cap stocks, the Russell 1000 Value Index returned a disappointing -5.9% but was down much less than the Russell Large Cap Growth Index, which fell -10.9% for the year.
- Outside of large cap issues, 2023's strong 1st quarter growth benchmark results were enough to push growth results over their value equivalents at both mid and small cap levels for the year. The Russell Mid Cap Value Index returned -9.2% and the small cap Russell 2000 Value Index returned -13.0% for the period. The growth benchmark counterparts at both capitalization levels were each down less than value.

Quarter Performance - Russell Style Series

1-Year Performance - Russell Style Series

Source: Investment Metrics

- Economic sector performance was mixed during the quarter. Seven of 11 economic sectors posted positive absolute performance for the quarter but just three managed to outpace the return of the broad index.
- After a challenging 2022, the information technology sector rebounded during the quarter on hopes that inflation was softening, and that the Fed would soon end its rate hiking cycle. The sector returned an impressive 21.2% in the quarter. The other two sectors that outpaced the headline index's return for the quarter were communication services (20.4%) and consumer discretionary (15.3%). The energy (-5.1%), financials (-4.8%), health care (-3.8%), and utilities (-3.2%) sectors each posted negative performance for the quarter.
- Eight small cap economic sectors posted positive results during the quarter and six exceeded the 2.7% return of the broader Russell 2000 Index. The consumer discretionary (11.9%) and information technology (14.2%) sectors each posted double-digit gains for the quarter while the energy (-3.9%), financials (-8.7%), and health care (-18.3%) sectors posted negative returns.
- For the full year, seven economic sectors exceeded the return of the broad large cap benchmark, but only the energy (12.6%) and consumer staples (1.1%) sectors managed to post positive performance for the period. The weakest economic sector in the Russell 1000 for the year was Real Estate, which declined by -19.5% and was heavily impacted by rising interest rates.
- Similar to large cap sector performance, for the trailing 1-year period only two small cap sectors were positive. Energy was the best performing sector followed by consumer staples, which posted returns of 3.5% and 3.7%, respectively. Four of the 11 economic sectors were down less than the broad small cap benchmark's return of -11.6%. The worst performing sector for the year was communication services with a return of -30.8%. However, the information technology (-12.0%), financials (-17.0%), health care (-18.3%), and real estate (-24.3%) sectors were also down significantly for the year.

- Many of the International developed and emerging market benchmarks posted positive performance in both USD and LCL terms for the 1st quarter. A weakening USD acted as a slight tailwind for non-US index performance during the quarter. Higher energy prices and the reopening of China drove performance, especially in emerging markets. Europe and Middle East sub-index led results, returning a strong 10.5% in USD and 8.6% in LCL. The developed market MSCI EAFE Index returned a solid 8.5% in USD and 7.5% in LCL terms for the period, and the MSCI Emerging Markets Index rose by 4.0% in USD and 3.8% in LCL terms.

- The trailing 1-year results for international developed and emerging markets remain in negative territory in USD terms. A strong dollar over most of the trailing 1-year period was the dominant USD performance factor, shaving 5.2% off broad developed market performance and 4.0% from emerging market results. Developed market performance was positive in LCL terms with the MSCI EAFE Index returning -1.4% in USD and 3.8% in LCL terms for the year. The MSCI Emerging Markets Index declined by -10.7% in USD and -6.7% in LCL terms for the period. Performance in the EMEA (Europe, Middle East, and Africa) regional benchmark significantly detracted from emerging market index performance with a return of -17.8% in USD and -12.3% in LCL terms.

As a result of the GICS classification changes on 9/28/2018 and certain associated reporting limitations, sector performance represents backward looking performance for the prior year of each sector's current constituency, post creation of the Communication Services sector.

- After a challenging 2022 in fixed income markets brought on by the largest and most rapid increase in interest rates since the early 80's, the 1st quarter's positive bond benchmark results were a welcome relief. Despite two additional rate increases during the quarter, bond prices were aided by softening inflation and expectations that the Fed was nearing the end of its historic rate hiking cycle.
- The BB US Aggregate Bond Index, the bellwether US investment grade benchmark, returned a solid 3.0% for the period. Performance across the investment grade index's segments was also positive during the period with the US Corporate Investment Grade Index returning 3.5% and the US Mortgage Index component posting a return of 2.5%. Outside of the aggregate index's components, high yield bonds rose 3.6% and US TIPS posted a return of 3.3% for the quarter. The Bloomberg Global Aggregate ex US Index posted a similar return to the US bond benchmark with a return of 3.1% for the quarter.
- Over the trailing 1-year period, the BB US Aggregate Bond Index declined by -4.8% and each of the benchmark's sub-components fell in a narrow band above and below the broad index's return. US TIPS, which are excluded from the aggregate index, dropped by -6.1% for the year. Lower quality high yield corporate bonds, which have a much shorter duration, were down less than their investment grade counterparts with the Bloomberg US High Yield Index returning -3.3% for the year.
- Performance for non-US bonds was also negative for the year with the developed market Bloomberg Global Aggregate ex US Index falling by -10.7%. The combination of rising interest rates, elevated inflation, geopolitical risks, and USD strength earlier in the year hindered non-US index performance.

Quarter Performance

1-Year Performance

Source: Bloomberg

- The gray band across the graph illustrates the range of the current Fed Funds Rate. During the 1st quarter the Fed raised the lower end of its target rate range from 4.25% to 4.75% through two successive 0.25% increases in February and March. After its March meeting, the Federal Open Market Committee (FOMC) altered a phrase in its press release that had been included since the beginning of this rate increase cycle. Their revised release stated - "some additional policy firming may be appropriate" and it removed "ongoing increases in the target range will be appropriate." The FOMC also stated that it would continue its policy of removing liquidity from the market by allowing bonds held on its balance sheet to mature without reinvesting those proceeds. While subtle, the capital market interpreted this change favorably in terms of the future path of interest rates.
- The yield on the US 10-year Treasury (green line) ended the period slightly lower as concerns over the state of the economy and March's banking disruption drove yields. The closing yield on the 10-Year Treasury was 3.88% at year-end but finished the quarter 0.40% lower at 3.48%. The benchmark's rate peaked in October, cresting at just over 4.00% before pulling back to its current level.
- The blue line illustrates changes in the BAA OAS (Option Adjusted Spread). This measure quantifies the additional yield premium that investors require to purchase and hold non-US Treasury investment grade issues. For the full year, the spread widened slightly from 1.42% to 1.80%. High Yield OAS spreads rose from roughly 3.27% at the beginning of the year to 4.74% at year-end. High yield spreads reached their highs in July 2022 at a level of 5.80% before trading lower the remainder of the year. A spike in both the BAA OAS and High Yield spreads is visible in March following a short-lived banking crisis of confidence addressed quickly by the FDIC and supported further by the Fed's aggressive short-term par loan program. Both spread measures traded lower on the news of the Government's intervention but were still elevated from pre-crisis levels at the end of the quarter.
- The lower graph provides a snapshot of the US Treasury yield curve at the end of each of the last four quarters. Short-term rates continued to rise during the 1st quarter as the Fed increased interest rates twice to combat elevated inflation. Despite these short-term rate increases, at the end of the quarter both intermediate and longer-term yields were slightly lower than they were at the end of the 3rd quarter of 2022. The yield curve remains inverted (short-term rates higher than long-term rates) between 2-year and 10-year maturities. Historically, a persistent inversion of these two key rates has been a precursor of an economic recession within 6- to 24-months.

Returns for periods greater than one year are annualized. Returns are expressed as percentages.

Active Return	- Arithmetic difference between the manager's performance and the designated benchmark return over a specified time period.
Alpha	- A measure of the difference between a portfolio's actual performance and its expected return based on its level of risk as determined by beta. It determines the portfolio's non-systemic return, or its historical performance not explained by movements of the market.
Beta	- A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.
Consistency	- The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. Higher consistency indicates the manager has contributed more to the product's performance.
Distributed to Paid In (DPI)	- The ratio of money distributed to Limited Partners by the fund, relative to contributions. It is calculated by dividing cumulative distributions by paid in capital. This multiple shows the investor how much money they got back. It is a good measure for evaluating a fund later in its life because there are more distributions to measure against.
Down Market Capture	- The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance
Downside Risk	- A measure similar to standard deviation that utilizes only the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. A higher factor is indicative of a riskier product.
Excess Return	- Arithmetic difference between the manager's performance and the risk-free return over a specified time period.
Excess Risk	- A measure of the standard deviation of a portfolio's performance relative to the risk free return.
Information Ratio	- This calculates the value-added contribution of the manager and is derived by dividing the active rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.
Public Market Equivalent (PME)	- Designs a set of analyses used in the Private Equity Industry to evaluate the performance of a Private Equity Fund against a public benchmark or index.
R-Squared	- The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.
Return	- Compounded rate of return for the period.
Sharpe Ratio	- Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.
Standard Deviation	- A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.
Total Value to Paid In (TVPI)	- The ratio of the current value of remaining investments within a fund, plus the total value of all distributions to date, relative to the total amount of capital paid into the fund to date. It is a good measure of performance before the end of a fund's life
Tracking Error	- This is a measure of the standard deviation of a portfolio's returns in relation to the performance of its designated market benchmark.
Treynor Ratio	- Similar to Sharpe ratio but utilizes beta rather than excess risk as determined by standard deviation. It is calculated by taking the excess rate of return above the risk free rate divided by beta to derive the absolute rate of return per unit of risk. A higher value indicates a product has achieved better historical risk-adjusted performance.
Up Market Capture	- The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.

AndCo compiled this report for the sole use of the client for which it was prepared. AndCo is responsible for evaluating the performance results of the Total Fund along with the investment advisors by comparing their performance with indices and other related peer universe data that is deemed appropriate. AndCo uses the results from this evaluation to make observations and recommendations to the client.

AndCo uses time-weighted calculations which are founded on standards recommended by the CFA Institute. The calculations and values shown are based on information that is received from custodians. AndCo analyzes transactions as indicated on the custodian statements and reviews the custodial market values of the portfolio. As a result, this provides AndCo with a reasonable basis that the investment information presented is free from material misstatement. This methodology of evaluating and measuring performance provides AndCo with a practical foundation for our observations and recommendations. Nothing came to our attention that would cause AndCo to believe that the information presented is significantly misstated.

This performance report is based on data obtained by the client's custodian(s), investment fund administrator, or other sources believed to be reliable. While these sources are believed to be reliable, the data providers are responsible for the accuracy and completeness of their statements. Clients are encouraged to compare the records of their custodian(s) to ensure this report fairly and accurately reflects their various asset positions.

The strategies listed may not be suitable for all investors. We believe the information provided here is reliable, but do not warrant its accuracy or completeness. Past performance is not an indication of future performance. Any information contained in this report is for informational purposes only and should not be construed to be an offer to buy or sell any securities, investment consulting, or investment management services.

Additional information included in this document may contain data provided by from index databases, public economic sources and the managers themselves.

This document may contain data provided by Bloomberg Barclays. Bloomberg Barclays Index data provided by way of Barclays Live.

Alpha - A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta.

Batting Average – A measure of a manager's ability to consistently beat the market. It is calculated by dividing the number of months in which the manager beat or matched an index by the total number of months in the period.

Best Quarter- This is the highest quarterly (3 month) return of the investment since its inception.

Beta - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.

Down Period Percent - Number of months below 0 divided by the total number of months.

Downmarket Capture Ratio - The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance.

Downside Std Dev - This measures only deviations below a specified benchmark.

Excess Return- This is a measure of an investment's return in excess of a benchmark.

Information Ratio - This calculates the value-added contribution of the manager and is derived by dividing the excess rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.

Longest Down-Streak Return - Return for the longest series of negative monthly returns.

Longest Down-Streak # of Periods - Longest series of negative monthly returns.

Longest Up-Streak Return - Return for the longest series of positive monthly returns.

Longest Up-Streak - Longest series of positive monthly returns.

Kurtosis - Kurtosis indicates the peakedness of a distribution. For normal distribution, Kurtosis is 3.

Max Drawdown - The peak to trough decline during a specific record period of an investment or fund. It is usually quoted as the percentage between the peak to the trough.

Max Drawdown # of Periods - This is the number of months that encompasses the max drawdown for an investment.

R-Squared - The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.

Return - Compounded rate of return for the period.

Sharpe Ratio - Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.

Skewness - Skewness reflects the degree of asymmetry of a distribution. If the distribution has a longer left tail, the function has negative skewness. Otherwise, it has positive skewness. A normal distribution

is symmetric with skewness 0.

Sortino Ratio - The Sortino Ratio is similar to Sharpe Ratio except it uses downside risk (Downside Deviation) in the denominator. It was developed in early 1980's by Frank Sortino. Since upside variability is not necessarily a bad thing, Sortino ratio is sometimes more preferable than Sharpe ratio.

Standard Deviation - A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.

Tracking Error - This is a measure of the standard deviation of a portfolio's excess returns versus its designated market benchmark.

Treynor Ratio - Similar to Sharpe Ratio, Treynor Ratio is a measurement of efficiency utilizing the relationship between annualized risk-adjusted return and risk. Unlike Sharpe Ratio, Treynor Ratio utilizes "market" risk (beta) instead of total risk (standard deviation). Good performance efficiency is measured by a high ratio.

Up period Percent - Number of months above 0 divided by the total number of months.

Upmarket Capture Ratio - The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.

Value-Growth Score - Morningstar assigns an Overall Value score and an Overall Growth score to each stock within a fund. Morningstar then calculates a net value-core-growth score for each stock by subtracting the stock's Overall Value score from its Overall Growth score. Once this is done, these raw scores are rescaled to range between -100 to 400 in order to fit within the Morningstar Style Box. Scores below 67 are classified as value, scores above 233 are classified as growth, and scores between 67 and 233 fit within the core boundaries.

Worst Quarter - This is the lowest quarterly (3 month) return of the investment since its inception.

IMPORTANT DISCLOSURE INFORMATION

This material is confidential and not intended for distribution to the public. AndCo Consulting (“AndCo”) compiled this report for the sole use of the client for which it was prepared. Any information contained in this report is for informational purposes only. It should not be regarded as investment advice, as a recommendation regarding any particular course of action or construed as an offer to buy or sell any securities for investment consulting, or investment management analysis services. The strategies listed may not be suitable for all investors and there is no guarantee that the strategies listed will be successful. Additionally, the analysis provided, while generally comprehensive, is not intended to provide complete information on each of the management organizations or their underlying strategies. Please refer to their respective prospectus for complete terms, including risks and expenses.

Performance data is provided for historical and informational purposes only. Where applicable, results shown represent past performance and do not represent expected future performance or experience. Past performance does not guarantee future results. Returns are typically stated net of fees, which may include: investment advisory fees, taxes and other expenses. There may be instances where certain returns are shown gross of fees (i.e., before the aforementioned fees are deducted) and would be noted as such. Generally, there are two instances where returns may be shown as gross figures. In the case of separate accounts, typically returns are demonstrated as gross of fees due to the fact that the fee structure would generally vary widely depending on the client’s size and circumstances. Additionally, there are instances where a strategy vehicle is relatively new and does not have a sufficiently long track record to represent a viable comparison relative to other strategies. Accordingly, the returns for the separate account version of such a strategy could be used as demonstrative of the performance for a similar vehicle; separate account returns are generally shown as gross of fees. It is important to note that any such separate accounts being used as a “proxy” are strictly for illustrative purposes. An investor should not expect the same results from the actual strategy(ies) under consideration. When client-specific performance is shown, AndCo uses time-weighted calculations, which are founded on standards recommended by the CFA Institute. In these cases, the performance-related data shown are based on information that is received from custodians. As a result, this provides AndCo with a reasonable basis that the investment information presented is free from material misstatement.

RISK FACTORS

THE RISK DISCLOSURES HEREIN DO NOT PURPORT TO COVER ALL RISKS, PLEASE REFER TO THE RESPECTIVE OFFERING DOCUMENTS FOR COMPLETE INFORMATION.

As presented in this report, although investing in equities can be beneficial, it is also important to consider the associated risks. Investing in equities may not be suitable for all investors. Equity markets can be volatile and can decline significantly in response to, or investor perceptions of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. These conditions can affect a single issuer or type of security, issuers within a broad market sector, industry or geographic region, or the equity markets in general. The primary risk factors to consider include, but are not limited to: stock market risk, manager risk, investment style risk, sector-focus risk, issuer risk and liquidity risk. Prospective investors should be aware of the risks in investing in non-U.S. securities. Securities of issuers domiciled outside of the U.S. may lose value because of adverse political, social and economic factors in those countries. Non-U.S. securities carry special risks such as less developed or less efficient trading markets, political instability and differing auditing and legal standards. Additionally, international equities experience emerging market risk. Emerging market countries can generally have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. The primary other risk factors which affect international equities include, but are not limited to: market risk, issuer risk, foreign currency risk and liquidity risk. The securities markets are volatile and the market prices of the funds’ securities may decline generally. Securities fluctuate in price based on changes in a company’s financial condition and overall market and economic conditions. If the market prices of the securities owned by the fund fall, the value of your investment in the fund will decline. Depending on the specific strategy, there many additional considerations such as the risks associated with equity investing.

MEMORANDUM	
TO:	City of Jacksonville Beach General Employees' Retirement Plan City of Jacksonville Beach Police Officers' Retirement Plan City of Jacksonville Beach Firefighters' Retirement Plan
FROM:	Duston Scott, Payroll/Benefits Administrator
DATE:	April 27, 2023
SUBJECT:	2024 Recommended Annual Operating Budgets

Attached are the proposed 2024 operating budgets for the City of Jacksonville Beach General Employees' Retirement Plan, Police Officers' Retirement Plan and Firefighters' Retirement Plan. The budgets were prepared using the following assumptions:

Revenues:

Investment Earnings – Estimated at 7.0% (7.50% actuarial assumption).

Member Contributions – 7.95% of estimate payroll for 2024. (General, Police, and Fire employee contribution rate).

City Contributions – Per actuary for 2024. (0.93% decrease in General, 106.6% increase in Police, and 0% increase in Fire.

Tax Revenues – Police tax revenues are projected the same as last year actual. The City will no longer receive Fire tax revenues due to the outsourcing the Fire services. Jacksonville will receive the tax revenues going forward.

Expenses:

Personal Services – Allocation of the Pension Plan Administrator's salary (General 38.73%, Police 13.75%, and Fire 9.02%).

Professional Services – 3% increase in AndCo. annual fee.

Contract Services – Adjustment were made to travel budgets to account for increased participation in FPPTA conferences.

Pension Benefits – Estimated based on current year benefits paid plus new retirees and projected Back-DROP payments for fiscal year 2024.

Accounting/Audit – Same as prior year on internal service fund charges

Memo

Page 2

Overall, the General Employees' Retirement Plan budgeted expenses are 1.8% higher than last year due to an adjustment to pension benefits, the Police Officers' Retirement Plan budgeted expenses are 0.2% higher than the prior year, and the Firefighters' Retirement Plan budgeted expenditures are 0.5% higher.

RECOMMENDATION

Recommend approval of the 2023/2024 annual operating budgets for the City of Jacksonville Beach General Employees' Retirement Plan, Police Officers' Retirement Plan and Firefighters' Retirement Plan.

ALL PENSION FUNDS
SUMMARY OF REVENUES AND EXPENSES

	Actual 2020	Actual 2021	Actual 2022	Budget 2023	Proposed Budget 2024	Increase (Decrease)	% Change
